

Municipal Archaeological/ Cultural History Plan:

This item for discussion is to create a master plan that would map out how to better identify, conserve and protect, HRM owned and private heritage sites. In doing so HRM would create a venue in the form of a municipal museum to display archaeological finds, while opening a central venue of education on the history of HRM, good or bad. Further, identify the need for a city historian by bringing the heritage planning team and a new municipal museum team together. This would give heritage and cultural assets the respect HRM has not given in the past.
