Jacques Dubé, Chief Administrative Officer

DATE: May 20, 2020

SUBJECT: 2019/20 Q4 Halifax Transit KPI Report

INFORMATION REPORT

ORIGIN

This report originates from the following motion passed at the July 3, 2013 Transportation Standing Committee meeting:

“That the Transportation Standing Committee receive a quarterly report and presentation regarding Metro Transit strategic planning and operations.”

LEGISLATIVE AUTHORITY

Section 69(1) of the Halifax Regional Municipality Charter provides the legislative authority for the municipality to provide a public transportation service.

BACKGROUND

This report provides a summary of activities in the fourth quarter and includes reporting on both annual and fourth quarter key performance measures. These include measures of revenue, ridership, boardings, overloads, on-time performance, loss of service, customer service, service levels, and Access-A-Bus service details.

DISCUSSION

Halifax Transit is committed to advancing Regional Council’s transportation priority outcomes of:

- A Safe and Accessible Transportation Network
- Interconnected and Strategic Growth
- A Well-maintained Transportation Network

To assist in achieving these priority outcomes, multi year initiatives were identified in the 2019/20 Halifax Transit Business Plan. These are described below, along with updates on relevant projects and programs that support the goals. Attachment A includes a detailed description of the deliverables identified in the business plan to support these priority outcomes.

A Safe and Accessible Transportation Network

Multi Year Initiative – *“Transit Accessibility - Halifax Transit is committed to improving the accessibility of transit services in HRM. This includes improvements to the conventional service to make it an inclusive, viable option for more persons with reduced mobility, as well as improvements to the Access-A-Bus system to ensure it is meeting the needs of people who rely on that service. This includes physical infrastructure, policy and process improvements, engagement with the community, staff training and vehicle improvements.”*

A Safe and Accessible Transportation Network	
Business Plan Deliverable	Status
Access-A-Bus Continuous Service Improvement Plan	In Progress – behind schedule
Bus Stop Accessibility & Improvement	Complete
Fare Management Project – Phase 1	In Progress – behind schedule
Fare Management Project – Phase 2	In Progress
Fixed Route Planning, Scheduling, and Operations	In Progress – behind schedule

Q4 Highlights – The Department of Community Services (DCS) Transit Pilot Pass Program enrollment continued to grow until March 2020. As of March 2020, approximately 10,797 passes have been issued to DCS clients.

Affordable Access Program*: Low Income Transit Pass Program (LITP)

As of March 2020, approximately 1,975 residents had been approved to purchase monthly transit passes at the 50% discounted fare. During the fourth quarter, an average of 64% of the participants purchased a discounted monthly pass.

Month	Passes purchased	Approved applicants	Inactive participants removed	Approved applicants on waitlist
January 2020	1,220	1,906	n/a	n/a
February 2020	1,279	1,975	n/a	n/a
March 2020	1,312	1,975	n/a	n/a

The Affordable Access Program allows qualified individuals to apply for municipal subsidized programs. This new intake process allows residents to apply for three municipal programs at one time (LITP, Recreational Programs, and Property Tax Exemption).

Multi-Year Initiative – *“Transit Technology - Through the implementation of improved transit technology including Electronic Fare Management Systems, Halifax Transit is transforming the way customers interact with the transit system. In addition to providing improved service reliability and enhanced customer*

experience, new technology will provide data and management opportunities to inform increased efficiency of the transit system.”

Q4 Highlights – In the fourth quarter of 2019/20, the Halifax Transit Technology Program continued to focus on the delivery of three concurrent projects: Fixed Route Planning, Scheduling, & Operations; Fare Management; and Paratransit.

The Fixed Route Planning, Scheduling & Operations project team continued to focus on environment configuration, subject matter expert demo sessions, and training deliverables for the implementation of Phase 1, the replacement of HASTUS. The Fare Management project team continued work on a recommendation to Regional Council regarding the second phase of the fare management project, the introduction of electronic payment methods. The recommendation will be ready for presentation to the Regional Council in the first quarter of 2020/21. The Paratransit project team continued work on the second phase of the Paratransit project – the addition of mobile data computers (MDCs) to all Access-A-Bus vehicles. An RFP, that had previously been issued will be reposted in early 2020 with updated requirements.

Interconnected and Strategic Growth

Multi Year Initiative – *“Transit Service Plan - Halifax Transit intends to offer its residents a significantly improved transit service. Guided by principles of integrated mobility, high ridership opportunity, and future sustainability, Halifax Transit is undertaking a multi-year initiative that includes a holistic and comprehensive review of the transit system and implementation of approved recommendations.”*

Interconnected and Strategic Growth	
Business Plan Deliverable	Status
Moving Forward Together Plan Implementation - Year 3	Complete
Transit Priority Measures	In Progress

Q4 Highlights – The Rapid Transit Strategy was substantially completed in 2019/20. The Strategy was informed by a streamlined public engagement program that produced significant feedback on the proposed Rapid Transit Network. Two workshops were conducted with external stakeholders and nine pop-up sessions held around the municipality engaged 939 residents. An online survey deployed on HRM’s Shape Your City platform received 6,125 responses. The Strategy includes four Bus Rapid Transit (BRT) lines which will provide fast, frequent and reliable service to over 120,000 people and 100,000 jobs and three new ferry routes that will provide direct connections between downtown Halifax and new terminals at Mill Cove, Larry Uteck and Shannon Park. The final Strategy was presented to Regional Council and received approval in May 2020. External funding sources are now being pursued.

Detailed design work for the Bayers Road, Young Street and Robie Street transit priority corridor projects was completed in 2019/20 and construction will begin in 2020/21.

A Well-maintained Transportation Network

Multi Year Initiative – *“Transit Asset & Infrastructure Renewal - Halifax Transit will continue to promote transit as a key component of an integrated transportation system, as a competitor to the single occupant vehicle. To create an enhanced and more accessible experience for its customers, Halifax Transit will continue investment in the renewal of on-street infrastructure including construction of stop locations as well as replacement of Conventional and Access-A-Bus vehicles.”*

A Well Maintained Transportation Network	
Business Plan Deliverable	Status
Woodside Ferry Terminal Renovation	In Progress

Q4 Highlights – The Woodside Ferry Terminal Renovation is proceeding in two phases. Phase 1 prioritizes the installation of two new elevators to address significant issues with the existing vertical lift systems.

Phase 1 construction is progressing, and completion is anticipated by summer 2020. The design for Phase 2 has been finalized and was tendered in early 2020/21. Construction is anticipated to begin in summer 2020.

The Electric Bus Proposal was brought forward to Regional Council and adopted in May 2020. The Electric Bus Proposal is a plan to transform the conventional bus fleet to low-carbon or zero emission vehicles by purchasing battery electric buses and renovating the Transit Centres to accommodate charging and maintenance. The goal is to electrify over half of Halifax Transit's conventional fleet by 2028. External funding is now being pursued to support the implementation of this plan.

Diversity & Inclusion

All HRM business units are undertaking initiatives to advance diversity and inclusion to foster innovation and support an improved understanding of the community. Over the next two years, Halifax Transit will focus on equitable employment and accessible information and communication.

Diversity & Inclusion	
Business Plan Deliverable	Status
Equitable Employment	In Progress – Review activities on hold
Accessible Information and Communication	Complete

Q4 Highlights – Halifax Transit Bus Maintenance recruitment advertising was scheduled to end February 28, 2020 in advance of updating the marketing plan for 2020 with the start of the new Staffing Coordinator position. With the COVID-19 situation, recruitment efforts regarding student/international placements from ISANS, Women Unlimited, NSCC, and Nova Scotia Works were cancelled until further notice. The photographer/videographer was put on hold. Updated maintenance marketing material reflecting Halifax's diversity and inclusion initiative is anticipated to be ready late 2020. Collaboration discussions were placed on hold with NSCC regarding digital presentation requirements to present a live Q&A with students living within the Maritimes in fall 2020. This would replace the physical visit to the Dartmouth campus. Once this presentation is refined, opportunities to host this session across Canada will be investigated.

Halifax Transit completed orientation guides and videos for new users, in multiple languages, on "How to Use Halifax Transit". A community stakeholder distribution list and engagement plan has been developed to engage important community partners in the dissemination of materials. A Communications Strategy has been completed, and a post-pandemic implementation is planned.

A Halifax Transit Etiquette Communications Plan has been completed with the goal of creating awareness and mutual understanding of behaviours that ensure customers and Operators feel safe, respected, and welcome. Creative development is well underway, and the campaign will be deployed when service levels return to normal following COVID-19 service reductions.

Q4 Performance Measures Highlights –

The onset of the COVID-19 pandemic mid March 2020 resulted in the need to rapidly change the weekday schedules during the end of the fourth quarter. Consequently, data reporting tied to the weekday schedules was impacted between March 23rd and May 4th. During this period boardings data was unavailable and was estimated, based on March 20th boarding data. Fare collection ceased on March 18th, tickets and passes were no longer required to board. Schedule adherence data for weekdays during this period was also unavailable and instead covers January through to March 23rd.

Please see attachment B, Q4 Performance Measures Report, covering January, February and March and attachment C, Year End Performance Report, for additional performance measures and detailed route level statistics. As large-scale adjustments took effect mid quarter, on November 25, 2019, some routes have since been discontinued. Instances where route numbers have been re-used post implementation, will be labelled 'old versus 'new'.

Q4 Highlights:

- System wide On-Time Performance this quarter was 82%, an improvement of 2% from last year.
- The average daily bus and ferry boardings this quarter were 91,978 on weekdays, 49,631 on Saturdays and 33,103 on Sundays.
- The Departures Line received over 3900 passenger calls on a typical weekday this quarter.
- Overall revenue increased 9.7% this quarter compared to this quarter last year.
- Overall boardings decreased 4.5% this quarter from last year. Prior to the impacts of COVID-19, System wide boardings in Q4 were on pace to increase by 9.9%.
- Access-A-Bus operated trips decreased 9.2% this quarter from last year.
- This quarter 93% of customer feedback was resolved within service standards.
- The mean distance between failures for conventional transit services this quarter was 11,399 km, an improvement of 41.5% compared to Q4 of the previous year.
- The mean distance between service calls (MDBS) for conventional was 4,226 kms, an improvement of 13% compared to Q4 of the previous year, the MDBS for Access-A-Bus was 97,879 kms.
- The maximum daily number of buses that could not complete their scheduled service due to a mechanical defect was 13, while the daily average was 4.6.
- Maintenance cost per kilometer was \$1.31/km, two cents over the budget cost of \$1.29/km for the quarter.

Annual Highlights

- The impact of COVID-19 on overall On-Time Performance for part of March did not affect the overall annual average for 2019/20. On-Time Performance remained consistent with last year at 78%.
- In 2019/20 overall boardings increased 5.2% from the previous year. Prior to the impacts of COVID-19, Overall annual boardings were on pace to increase by 8.8%.
- In 2019/20 revenue increased 8.9% overall, compared to the previous year. Prior to the impacts of COVID-19, annual revenue was on pace to increase by 9.4%.
- Boardings are reported for weekdays, Saturdays, and Sundays. The average daily boardings in 2019/20 were 99,320, 56,643, 39,307 respectively.
- Trips provided by Access-A-Bus in 2019/20 decreased 2.2% from last year. The trips that were not provided increased 12.7%, compared to the previous year. Prior to the impacts of COVID-19, trips operated were on pace to increase 0.4% and trips not provided were on pace to increase 27%.
- The average fuel price in 2019/20 was 74 cents/litre, 6 cents lower than the budgeted cost per litre.
- The annual mean distance between failures for 2019/20 was 9,698, an improvement of 37% compared to 2018/19.
- The Maintenance cost per kilometer in 2019/20 was \$1.25/km, three cents lower than the budget cost of \$1.28/km.

FINANCIAL IMPLICATIONS

There are no financial implications associated with this report.

COMMUNITY ENGAGEMENT

No community engagement took place as part of this report.

Attachment A Halifax Transit 2019/20 Business Plan Deliverables

Halifax Transit 2019/20 Business Plan & Director Deliverables		
Deliverable	Description	Status
Access-A-Bus Continuous Service Improvement Plan	The continuous service review of AAB operations will address the implementation of service process changes that include improvement to booking times, increased ridership and revenue as well as overall improvement to processes and efficiencies. [Est. Compl. 20/21]	In Progress - Behind Schedule. New Technology in terms of Mobile Data Computers (MDCs) will be instrumental in achieving the vision of same day service and guaranteed accessible transit. The RFP for the MDCs had been issued, however was cancelled to include additional requirements. Efforts are currently underway to re-issue the RFP.
Bus Stop Accessibility & Improvement	To improve accessibility, as well as the customer experience, Halifax Transit will be installing accessible landing pads at a number of bus stops, replacing older bus shelters, and installing benches at bus stops. [Est. Compl. Q3 19/20]	2020/21 Work for concrete and shelter installations has been planned and is pending. Sites eligible for upgrade in 2020/21 have been identified. Work will begin in early summer 2020.
Fare Management Project – Phase 1	To increase revenues, increase operator safety, and provide timely data for management decisions, Halifax Transit will implement the first phase of a fare management solution. Validating fareboxes, automated transfers and management software will be installed. In 19/20 new fareboxes will be installed. [Est. Compl. Q2 19/20]	Delayed due to design and planning issues.
Fare Management Project – Phase 2	To improve the fare payment options available to riders, increase boarding efficiency, and reduce the reliance on currency and tickets, Halifax Transit will begin implementation of the second phase of a fare management solution. In 20/21, additional payment methods will be introduced. [Est. Compl. 20/21]	On Target
Fixed Route Planning, Scheduling and Operations	The primary objective of the Fixed Route Planning, Scheduling and Operations project is to implement a Planning, Scheduling and Operations software solution that enables Halifax Transit to operate more efficiently. The existing software is not capable of supporting the streamlined existing or new business processes required by Halifax Transit. In 19/20, the infrastructure will be set up, business rules will be configured within the system, and our schedule will be built within the system. Implementation will be completed in 20/21.	Delayed due to vendor development challenges.

Attachment A Halifax Transit 2019/20 Business Plan Deliverables

<p>Moving Forward Together Plan Implementation - Year 3</p>	<p>To improve the efficiency and effectiveness of the transit network, Halifax Transit will implement the 19/20 network design changes, including introduction of new service, changes to existing routes, and removal of service, as part of the implementation of the Moving Forward Together Plan. [Est. Compl. Q3 19/20]</p>	<p>Complete</p>
<p>Transit Priority Measures</p>	<p>To improve the reliability of the transit network, and reduce the impact of traffic congestion on transit service, Halifax Transit will continue to study opportunities and implement transit priority measures. This will include completing phase 2 of a transit priority measure on Main Street in Dartmouth, and implementing a measure on Portland Street. [Est. Compl. Q2 19/20]</p>	<p>Two transit priority measures were completed in 2019/20 (Main Street and Barrington Street). The transit priority measure for Portland Street requires additional design and will be explored further in 2020/21.</p>
<p>Woodside Ferry Terminal Renovation</p>	<p>The Woodside Ferry Terminal requires significant rehabilitation to all aspects of the building, including envelope, mechanical and electrical systems, and customer waiting areas. In 19/20, detailed design work will be completed and construction will begin. In 20/21, construction will complete.</p>	<p>The project is separated into two phases. Phase 1 construction (the elevator shaft and elevator install) has begun and is anticipated to be completed by summer 2020. The design for Phase 2 was tendered in early 2020/21. Construction is anticipated to begin in late summer or early fall 2020.</p>
<p>Equitable Employment</p>	<p>Halifax Transit will review recruitment processes to ensure an equitable approach and improve recruitment marketing and communication to remove barriers and provide equal opportunity to all. In 19/20 processes will be updated and marketing campaigns will be held. [Est. Compl. Q4 19/20]</p>	<p>In Progress. Review activities are on hold, due to COVID-19 and will resume once the new normal is established.</p>
<p>Accessible Information and Communication</p>	<p>Halifax Transit will consider inclusivity when planning information and communication tactics related to transit route network changes. This will include developing a strategy to reduce language and access barriers, and working with immigration partners to ensure new Canadians are actively engaged. [Est. Compl. Q4 19/20]</p>	<p>Information booklets for the November 25th Moving Forward Together Plan service implementation were translated in ten languages and distributed to community organizations and HRM Libraries in the areas affected by the service changes.</p> <p>Orientation guides and videos for new users, have been completed in multiple languages, on "How to Use Halifax Transit". A community stakeholder distribution list and engagement plan has been developed to engage important community partners in the dissemination of materials. A Communications Strategy has been completed, and a post-pandemic implementation is planned.</p>

COVID-19 Pandemic Data Impacts

The onset of the COVID-19 pandemic in early 2020 resulted in the need to rapidly implement emergency service adjustments to the weekday schedules. Consequently, data reporting tied to the weekday schedules was impacted between March 23rd and May 4th. During this period boardings data was unavailable and was estimated, based on March 20th boarding data. Fare collection ceased on March 18th, tickets and passes were no longer required to board. Schedule adherence data for weekdays during this period was also unavailable and instead covers January through to March 20th.

Boardings & Revenue

Revenue and boardings are reported to demonstrate how well transit services were used over the quarter, in comparison to the same quarter the previous year.

Automatic Passenger Counter (APC) systems installed throughout the network in 2017/18 enable Halifax Transit to track the number of boardings by counting passengers entering the bus at each stop, instead of estimating boardings from revenue. Therefore, the data source for boardings in the chart below changed effective 2017/18. When a trip requires a transfer, the boardings metric would count the same passenger each time they entered a new bus. This method of data collection provides a more accurate measure of how passengers are utilizing the system, as assumptions related to multi-use revenue sources, such as tickets and passes, are removed, and replaced by physical counts.

In the fourth quarter, conventional boardings decreased 4% from this quarter last year, ferry boardings decreased 15.5% and Access-A-Bus boardings decreased 10.1%. Overall, system wide boardings decreased 4.5% compared to fourth quarter last year.

Decreases in boardings are attributable to COVID-19, prior to the pandemic, conventional boardings were on pace to increase 10.1%, ferry boardings were on pace to increase 6.7%, and Access-A-Bus boardings were on pace to increase 1.1%. Overall boardings were on pace to increase 9.9%.

Revenue in March was largely unaffected by the pandemic. Prior to the month of March, overall revenue was on pace to increase 13.2% from this quarter last year. Overall revenue in the fourth quarter increased 9.7% from this quarter last year.

Historical Boardings & Revenue

Loss of Service

Loss of service represents the total number of scheduled bus service hours that were not completed. If a trip was able to be filled or partially filled by a standby bus, that time would not be included in this figure.

In the fourth quarter, the total loss of service was 609 hours, which is 0.3% of the quarterly revenue hours. The table below shows the total loss of service for each month. September 2019 figures do not include service lost due to Hurricane Dorian.

Mean Distance Between Failures

Halifax Transit's Mean Distance Between Failures (MDBF) is the distance in kilometres covered between failures. CUTA references the Federal Transit Administration's definition of failures which states that there are two classes of failures. The first being major mechanical system failures, which is the "failure of some mechanical element of the revenue vehicle that prevents the vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip because actual movement is limited or because of safety concerns." The second type is other mechanical system failures which is the "failure of some other mechanical element of the revenue vehicle that, because of local agency policy, prevents the revenue vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip even though the vehicle is physically able to continue in revenue service". Therefore, the MDBF is equal to the number of instances whereby a failure resulted in a change-off of the bus or service being lost. This metric does not consider failures resulting from passenger-related events (i.e. sickness on the bus), farebox defects or accident damages as they do not impede the scheduled revenue trips, which aligns with other transit authorities surveyed. Due to the nature of the data sources, Halifax Transit is looking to improve the accuracy of this number by removing failures that were logged but resulted in "no fault found". Currently, the reported number does include these items.

Bus Maintenance had set a target of 7,500 kms for 2019/20. The target for this KPI shall be revisited on annual basis to promote continuous improvement, which may be achieved by implementation and support of quality and preventative maintenance initiatives.

For the fourth quarter of 2019, the MDBF for conventional transit was 11,399 kms. This is equivalent to a 41.5% improvement from the fourth quarter of the previous year (2018/19). Bus Maintenance will continue to monitor this KPI and has implemented new preventative maintenance measures to reduce aftertreatment and cooling system defects.

Mean Distance Between Service Calls

Mean Distance Between Service Calls (MDBS) reflects the average distance in kilometres covered between maintenance service calls. This metric includes all instances of service calls, including issues with secondary equipment, passenger-related events and damages to the bus resulting from minor accidents. Bus Maintenance is continuing to benchmark this metric in order to provide a target.

For the fourth quarter of 2019/20, the MDBS for conventional transit was 4,226 kms. In comparison to the fourth quarter of 2018/19 (3,738), this is an improvement of 13%. Overall, the Mean Distance Between Service Calls has improved by 12% in 2019/20 over 2018/19. Therefore, bus reliability for conventional transit continues to improve significantly.

For the fourth quarter of 2019/20, the MDBS for Access-A-Bus service was 97,879 kms. Bus Maintenance will continue to monitor this metric in order to reduce service calls.

Bus Maintenance Cost – Quarter Average vs Budget

In the fourth quarter maintenance costs were \$1.31/km, while the budgeted maintenance cost was \$1.29/km. Therefore, in the fourth quarter the average cost per km was over budget by \$0.02/km. The overage is mostly attributed to seasonal fluctuations and is typical during the winter season. Bus Maintenance will continue to strengthen the budgeting process to improve accuracy of future budgets.

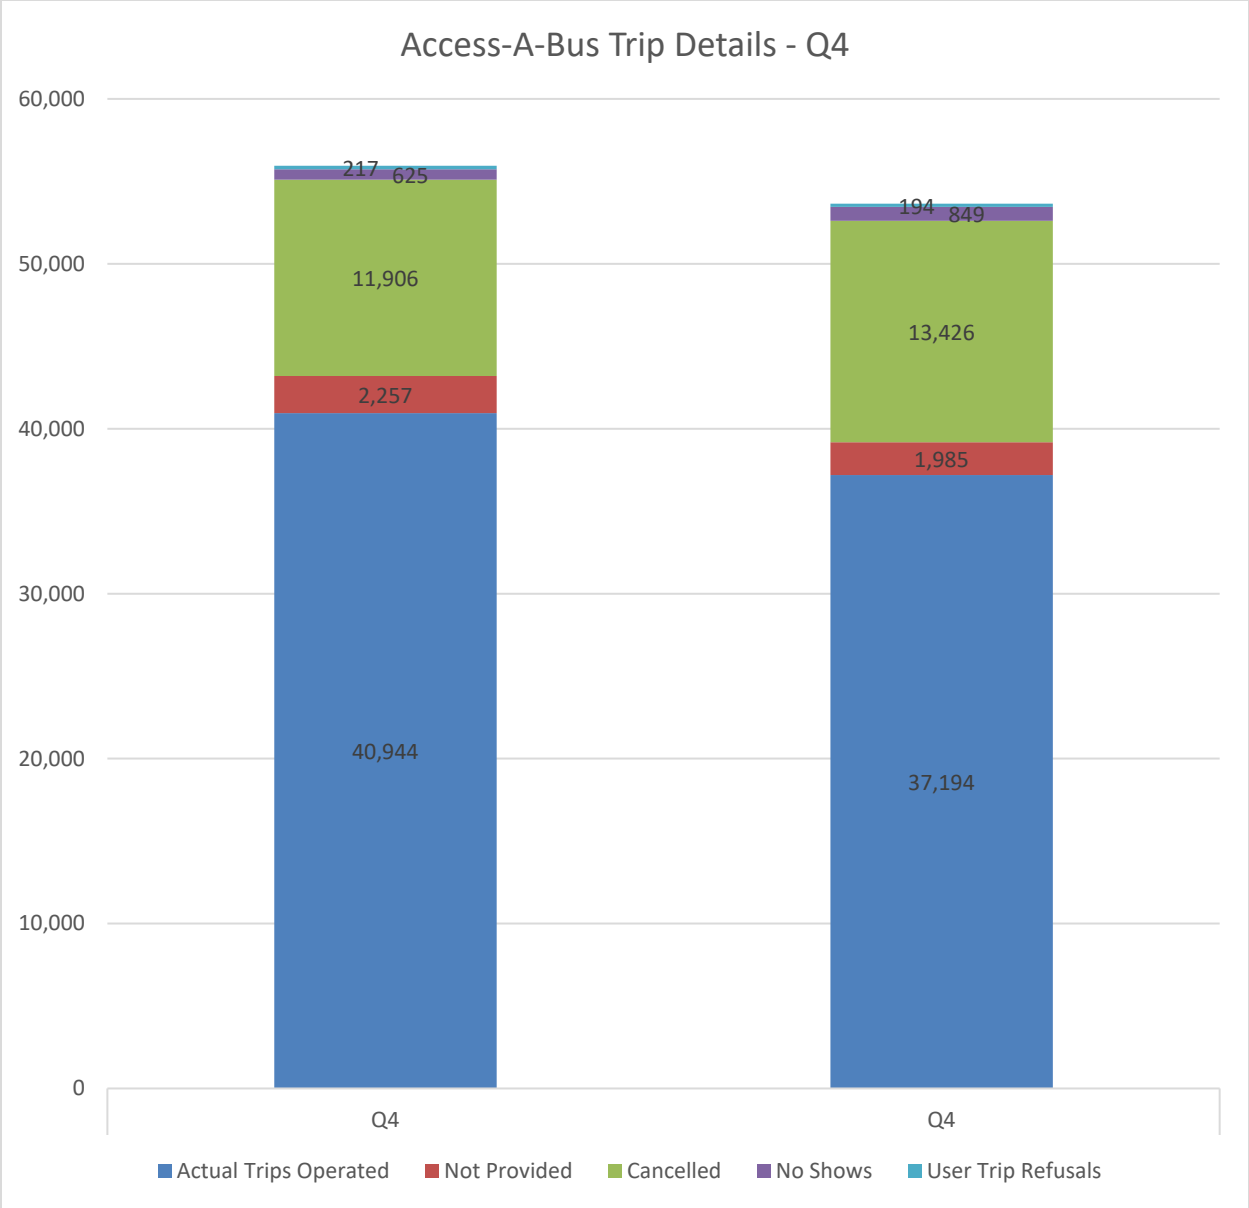

Access-A-Bus Trip Details

Access-A-Bus trip details are tracked monthly to provide an indication of efficiency in Access-A-Bus usage and booking. In April 2018 Access-A-Bus completed a scheduling software upgrade and process improvement review. After introducing these new, standardized processes, scheduling effectiveness has improved. These changes resulted in statistics such as the number of trip cancellations, no shows and errors, being recategorized and therefore, may not be comparable with prior years.

During a more recent review of the reporting processes for Access-A-Bus it was determined that further revision to the reporting categories would more accurately reflect the service and passenger experience and would better align with the key performance indicators. The category previously reported as “Waitlisted” will be reported as “Not Provided” and includes requested trips that could not be provided within the quarter. Those trips that were previously reported as “Not Provided” were erroneous and are now removed from the requested trip totals. A new category has been included; “User Trip Refusals” and includes any trips where the customer declined a booking that was offered within a half hour of their desired trip time. Analysis and interpretation of the new data set resulting from the 2018 software upgrade is ongoing. Partnership with the vendor continues and may result in future reporting changes, all in an effort to convey the most accurate and meaningful performance statistics possible.

In the fourth quarter of 2019/20, 3,740 fewer trips were operated compared to this quarter last year, a decrease of 9.2%. The trips that were not provided decreased by 12%, compared to this quarter last year.

Prior to COVID-19, trips operated were on pace to increase 2.1%, while trips not provided were on pace to decrease 14.3%

Customer Service – All Services

Customer service statistics are measured monthly using the Hansen Customer Relationship Management software along with Crystal Reports. Feedback is first categorized by subject matter and then divided into two categories: feedback resolved within service standard and feedback resolved outside service standard. The service standard varies depending on the subject matter.

In the fourth quarter, 44% of feedback received was related to bus Operators. The remaining 56% is comprised of feedback regarding service issues, planning and scheduling, bus stops and shelters, marketing, compliments and other miscellaneous comments. Halifax Transit aims to address 90% of feedback within service standard. This quarter 93% of customer feedback was resolved within standard.

Summary of Customer Feedback - Q4

Feedback resolved within standard: 93%

Customer Feedback Comparison - Q4

Call volumes to the Departures Line (902-480-8000) are displayed by day of the week. In the fourth quarter of 2019/20, average call volumes were lower than this time last year for weekdays as well as for Saturdays and Sundays.

Average Departures Line Call Volumes - Q4

Service Utilization

Automatic Passenger Counter (APC) data is now being used to report bus passenger boardings. The APCs provide data within a 90% degree of accuracy. Boardings by Route demonstrate passenger usage during the quarter. APC data has been collected since September 2016. The standard deviation is included to demonstrate the degree of variance in boardings from the daily average passenger count.

As large-scale service adjustments were implemented mid third quarter, on November 25, some routes have since been discontinued. Instances where route numbers have been reused post implementation are labelled 'old versus 'new'.

Boardings

Average weekday boardings in the fourth quarter were 91,978 ± 28,885 (31.4% variance). Average Saturday boardings this quarter were 49,631 ± 13,689 (27.6% variance). Average Sunday boardings this quarter were 33,103 ± 9,922 (30% variance).

These figures are impacted by COVID-19; prior to the pandemic average weekday boardings in the fourth quarter were 104,030 ± 15,716 (15.1% variance). Average Saturday boardings this quarter were 55,104 ± 3,956 (7.2% variance). Average Sunday boardings this quarter were 36,627 ± 5,562 (15.2% variance).

Average Daily Boardings by Service Day

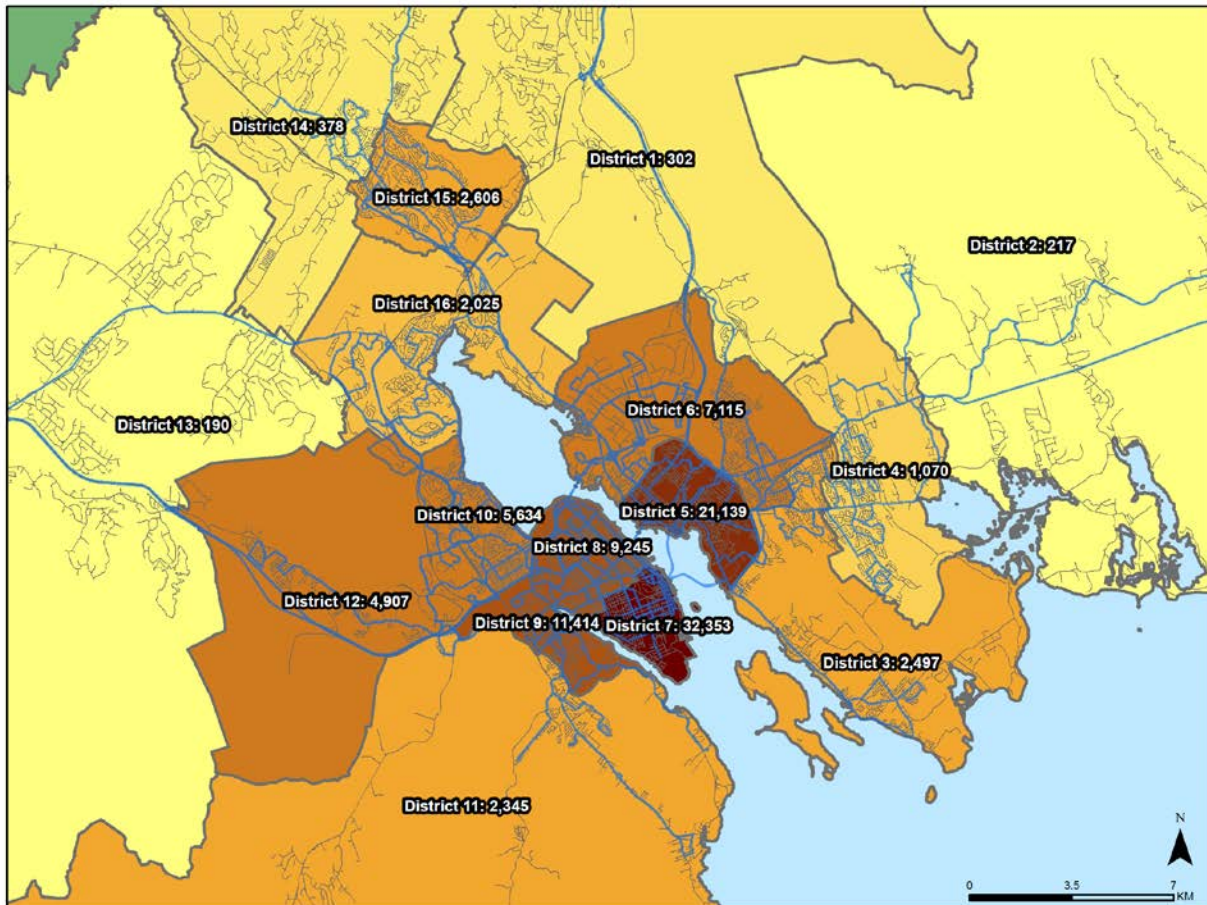

Boardings by District

To assist in visualizing where ridership demands exist, boardings have been mapped by district. The all-day boardings map illustrates typical boardings over an entire service day, whereas the AM Peak Period map represents boardings during the morning peak period only and therefore generally illustrates passenger origins.

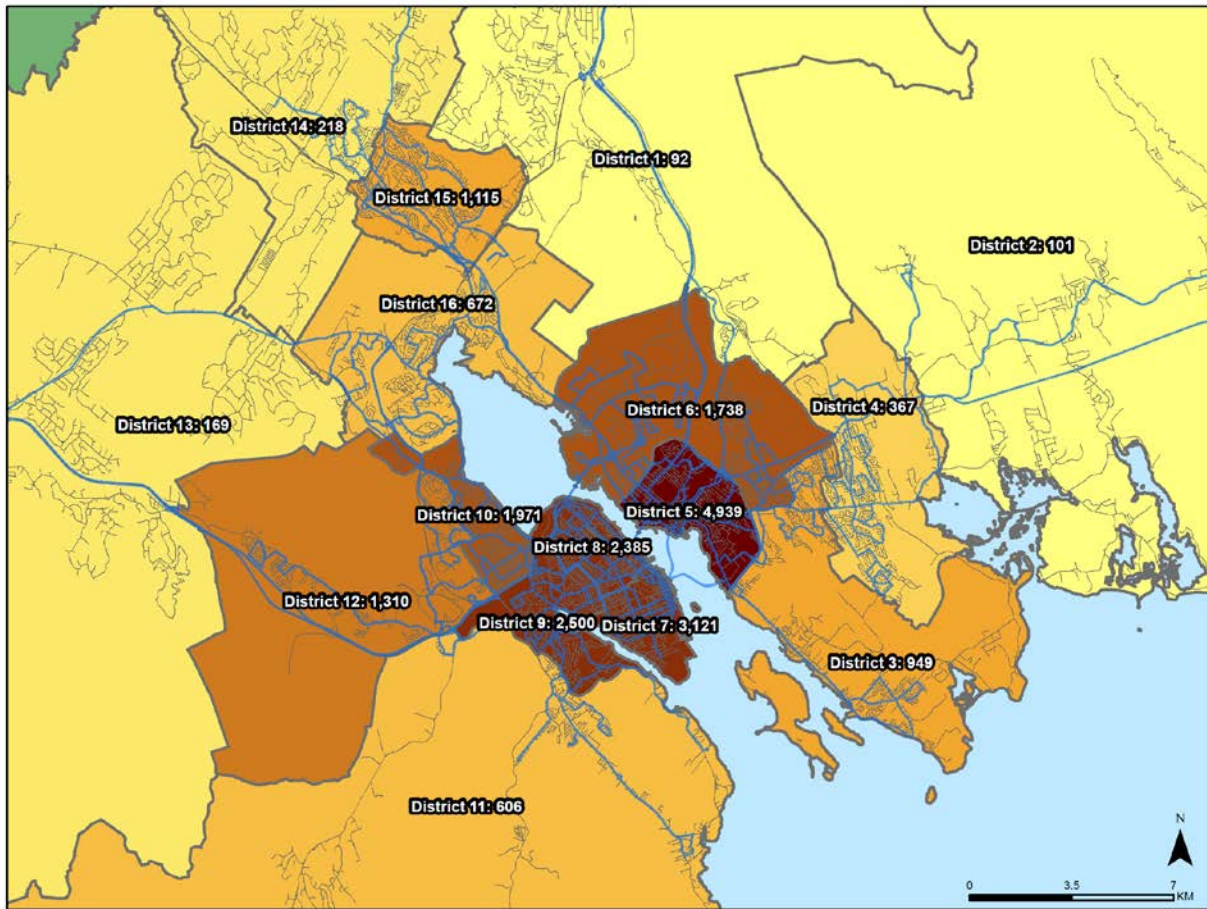

Weekday Boardings by District – All Day

2019-20 Q4 Weekday Boardings by District

Weekday Boardings by District – AM Peak Period

2019-20 Q4 Weekday AM Peak Boardings by District

Passengers per Hour

Passengers per hour measures the volume of passengers carried per service hour by route. Due to differences in service model/design, Express Routes are measured instead by passengers per trip. Ridership fluctuates significantly by season and therefore figures are compared to the same quarter in the previous year. Conventional route targets vary by time of day and are not illustrated at this time as data is being presented over the entire service day only. Express routes have a ridership target of 20 passengers per trip, while Regional Express Routes have a target of 15 passengers per trip.

All weekday data for Q4 represents January to March 20th, following March 20th weekday data for boardings and hours was unavailable due to emergency schedule adjustments.

Boardings & Passengers per Hour

Q4 Comparison - Average Daily Boardings by Route												
Route	Weekday				Saturday				Sunday			
	18/19		19/20		18/19		19/20		18/19		19/20

Passengers per Hour by Route

Express Service Peak Passengers per Trip by Route

Regional Express Peak Passengers per Trip by Route

Ferry Passengers per Hour

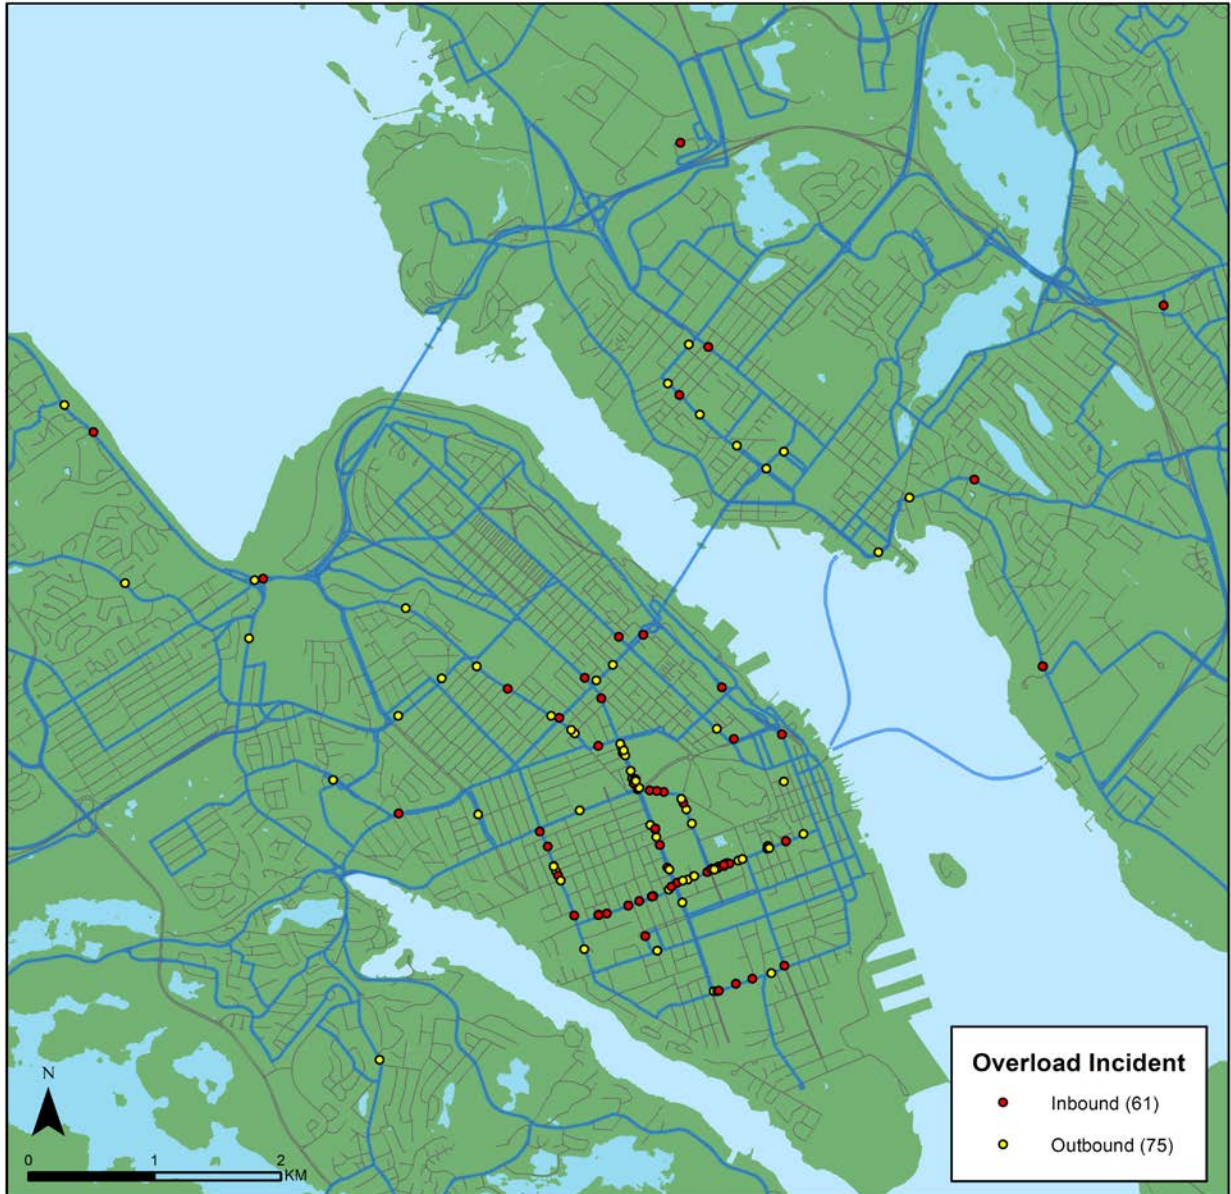

Passenger Overloads

Halifax Transit tracks overloads that are reported to help match scheduling requirements to passenger demands. Work is underway to improve the reporting process to ensure the data provides a more accurate reflection of actual conditions. All overloads may not be included, as many go unreported for a number of reasons.

Passenger Overloads by Area

The figure below shows the locations of all reported overloads during Q4.

2019-20 Q4 Passenger Overloads

Passenger Overloads by Route

The following graph shows overloaded routes during the quarter.

On-Time Performance

On-time performance is a measure of route reliability and is tracked monthly to demonstrate schedule adherence across the network of routes. Terminals and select bus stops along each route are classified as timepoints and have assigned and publicized scheduled arrival times. On-time performance demonstrates the percentage of observed timepoint arrivals that are between one minute early and three minutes late.

Transit industry standard targets for on-time performance tend to range between 85% and 90%, although service types are not always comparably grouped, nor are schedule adherence definitions consistent between agencies. Halifax Transit will analyze on-time performance across the network in order to establish a benchmark and target for the minimum percentage of trips to depart on time.

Compared to the fourth quarter last year, on-time performance improved from 80% to 82%. Prior to impacts of COVID-19 on-time performance was on pace for 81% in the fourth quarter.

Overall Network On-Time Performance

Weekday On-Time Performance

Q4 Weekday On-Time Performance

Weekday Peak Period On-Time Performance

Q4 Weekday Peak On-Time Performance

Express Service On-Time Performance

On-time performance demonstrates the percentage of timepoint arrivals that are between one minute early and three minutes late. When route schedules are created, the variability of travel times between timepoints is taken into account. Generally, routes are scheduled at the higher end of observed travel times in order to be on time. This means that on some trips, buses will layover at timepoints to avoid departing early. Schedules for express routes were created based on shorter travel times to keep buses moving toward destinations and prevent them from laying over.

The graph below demonstrates on-time performance for express routes based on timepoints at the beginning and end of the routes, as well as any terminals, major destinations and park and rides. This includes Scotia Square, Summer Street, and the future Wrights Cove Terminal location on Marketplace Drive but does not include some other on-street timepoints.

Due to a rapid schedule adjustment implemented in response to COVID-19, schedule adherence data was not available after March 20th. Average weekday On-Time Performance for the fourth quarter is averaged over the period January through March 20, 2020. Reductions in traffic congestion resulted from COVID-19 and is anticipated to be more evident in future quarters.

COVID-19 Pandemic Data Impacts

The onset of the COVID-19 pandemic in early 2020 resulted in the need to rapidly implement emergency service adjustments to the weekday schedules. Consequently, data reporting tied to the weekday schedules was impacted between March 23rd and May 4th. During this period boardings data was unavailable and was estimated, based on March 20th boarding data. Fare collection ceased on March 18th, tickets and passes were no longer required to board. Schedule adherence data for weekdays during this period was also unavailable and instead spans January through to March 20th.

Annual Key Performance Indicators (KPIs)

The following KPIs are measured on an annual basis to track changes and growth. Bus & Ferry figures do not include Access-A-Bus. Halifax Transit ridership overall has increased from last year. Scheduled fixed route service hours increased due to service improvements implemented in 2019/20. Despite this increase, a significant increase in the Municipal population in 2019/20 has resulted in negative per capita metrics. Customer service requests continue to be addressed well within the target of 90% within service standard, remaining at 93% this year.

KPI	Division	2018/19	2019/20	% Change
Service Utilization (Passengers per Capita)	Bus & Ferry	59.83	59.51	-0.5%
Service Utilization (Passengers per Service Hour)	Bus & Ferry	23.68	24.27	+2.5%
Amount of Service (Service Hours per Capita)	Bus & Ferry	2.53	2.45	-3.0%
Cost Effectiveness (Operating Expense per Passenger)	Bus & Ferry	\$4.99	\$5.11	+2.4%
Average Fare (Passenger Revenue per Passenger)	Bus & Ferry	\$1.75	\$1.84	+4.9%
Financial (Cost Recovery)	Bus & Ferry	35%	36%	+2.5%
Financial (Cost Recovery)	All	33%	34%	+2.0%
Customer Service (Requests addressed within standard)	All	95%	93%	-2.6%

Weekday Cost per Passenger

Boardings & Revenue

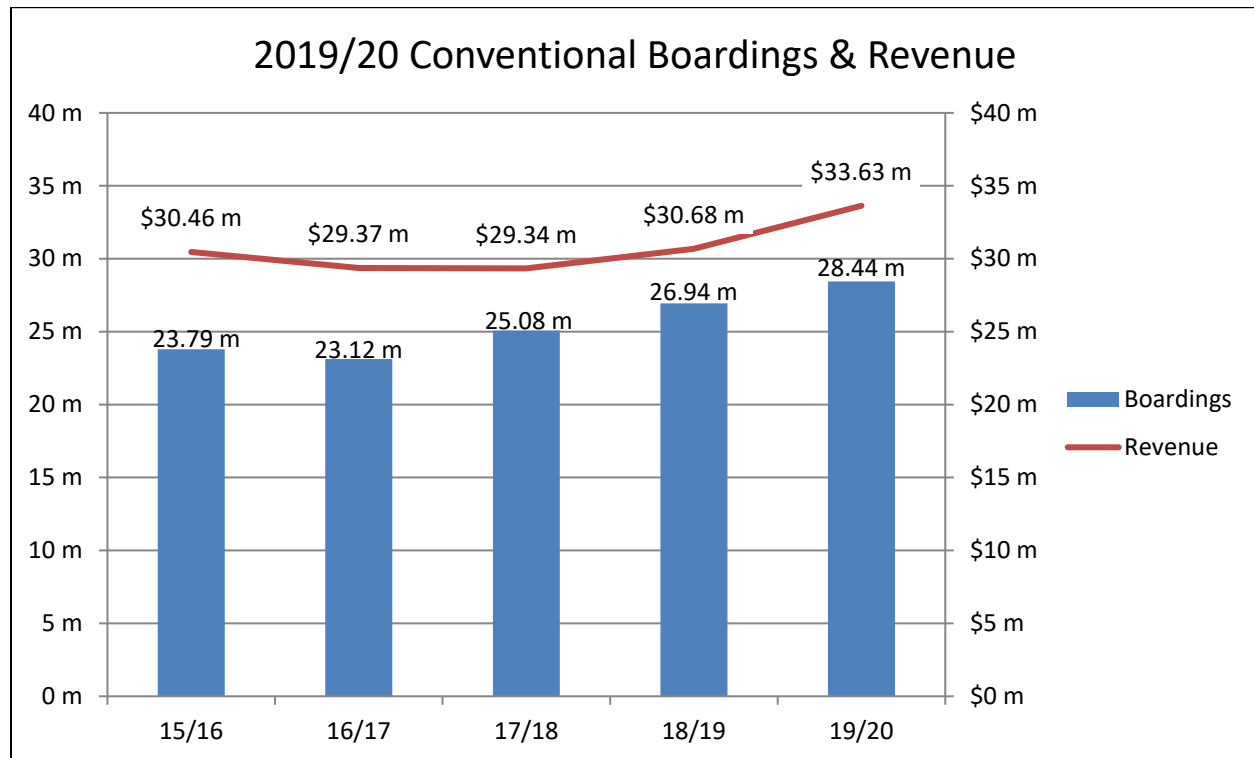

Revenue and boardings are reported to demonstrate how well transit services were used over the year, in comparison to the previous year. Fare changes were implemented in September 2019, which accounts for some of the increases in revenue seen this year.

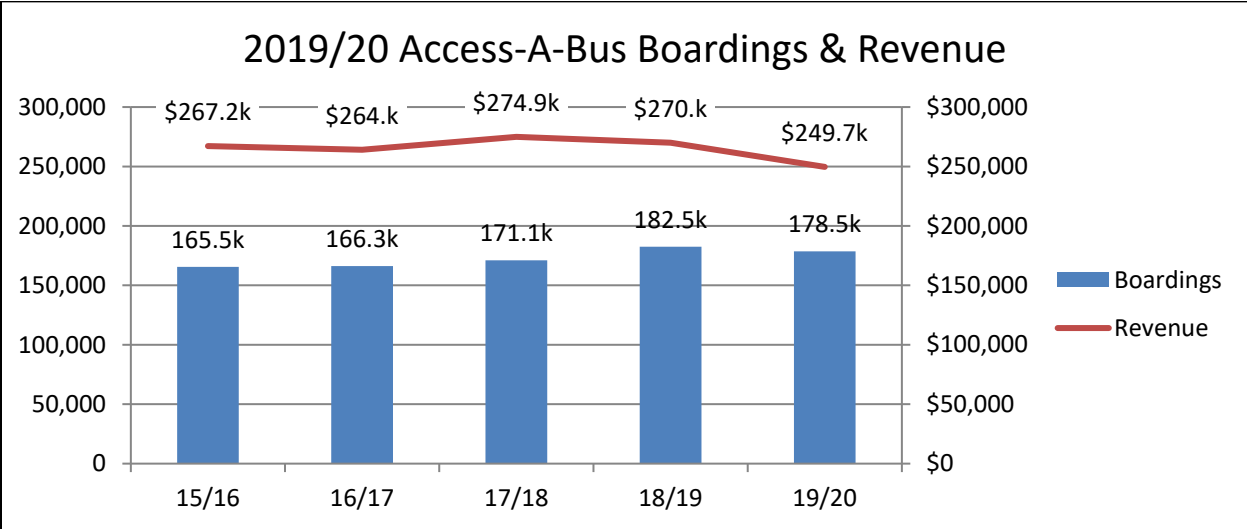

Automatic Passenger Counter (APC) systems installed throughout the network in 2017/18 enable Halifax Transit to track the number of boardings by counting passengers entering the bus at each stop, instead of estimating boardings from revenue. Therefore, the data source for boardings in the chart below changed effective 2017/18. When a trip requires a transfer, the boardings metric would count the same passenger each time they entered a new bus. This method of data collection provides a more accurate measure of how passengers are utilizing the system, as assumptions related to multi-use revenue sources, such as tickets and passes, are removed, and replaced by physical counts.

In 2019/20 conventional boardings increased 5.6% over 2018/19, ferry boardings increased 0.3% and Access-A-Bus boardings decreased 2.2%. Overall, system wide boardings increased 5.2% compared to last year. Overall revenue in 2019/20 increased 8.9% from last year.

Prior to the impacts of COVID-19 conventional boardings were on pace to increase 9.2% over 2018/19, ferry boardings were on pace to increase 4.3%, and Access-A-Bus boardings were on pace to increase 0.6%. Overall system wide boardings were on pace to increase 8.8%, while overall revenue was on pace to increase 9.4%.

Historical Boardings & Revenue

Revenue – Actual vs. Planned

The following charts provide an indication of how much revenue has been generated by each service type and by Halifax Transit in comparison to the planned budget revenue. In 2019/20 conventional revenue increased 9.6% over last year and was 4.7% above the planned amount. Ferry revenue this year increased 1.6% and was 0.8% below the planned amount. Access-A-Bus revenue decreased 7.5% over last year and was 10.8% below the planned amount. Overall revenue in 2019/20 has increased 8.9% from the previous year, standing 4.2% higher than the planned amount.

Prior to the impacts of COVID-19 conventional revenue was on pace to increase 9.9% over last year and be 5% above the planned amount. Ferry revenue was on pace to increase 5.1% and be 4.3% above the planned amount. Access-A-Bus revenue was on pace to decrease 4.5% and be 7.3% below the planned amount. Overall revenue in 2019/20 was on pace to increase 9.4% from the previous year and 4.9% higher than the planned amount.

Mean Distance Between Failures

Halifax Transit's Mean Distance Between Failures (MDBF) is the distance in kilometres covered between failures. CUTA references the Federal Transit Administration's definition of failures which states that there are two classes of failures. The first being major mechanical system failures, which is the "failure of some mechanical element of the revenue vehicle that prevents the vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip because actual movement is limited or because of safety concerns." The second type is other mechanical system failures which is the "failure of some other mechanical element of the revenue vehicle that, because of local agency policy, prevents the revenue vehicle from completing a scheduled revenue trip or from starting the next scheduled revenue trip even though the vehicle is physically able to continue in revenue service". Therefore, the MDBF is equal to the number of instances whereby a failure resulted in a change-off of the bus or service being lost. This metric does not consider failures resulting from passenger-related events (i.e. sickness on the bus), farebox defects or accident damages as they do not impede the scheduled revenue trips, which aligns with other transit authorities surveyed. Due to the nature of the data sources, Halifax Transit is looking to improve the accuracy of this number by removing failures that were logged, but resulted in "no fault found". Currently, the reported number does include these items.

Bus Maintenance had set a target of 7,500 kms for 2019/20. The target for this KPI shall be revisited on annual basis to promote continuous improvement, which may be achieved by implementation and support of quality and preventative maintenance initiatives.

For the 2019/20 fiscal year, the MDBF for conventional transit was 9,698 kms. This is equivalent to a 37% improvement from the previous year 2018/19 (7,089). Bus Maintenance will continue to monitor this KPI and further develop quality initiatives to decrease common on-the-road defects such as aftertreatment issues and engine lights. The improvement is attributed mostly to the implementation of added preventative measures and the replacement of old buses.

Bus Maintenance Cost –Average vs Budget

For the 2019/20 fiscal year maintenance costs were under budget by \$0.03/km. The average cost was \$1.25/km, while the budgeted maintenance cost was \$1.28/km. Bus Maintenance will continue to strengthen budgeting processes to improve accuracy of future budgets.

Fuel Price – Annual Average vs Budget

The budgeted fuel price for 2019/20 was set at 80 cents/litre. The average fuel price in 2019/20 was 74 cents/litre, 6 cents lower than the budgeted cost per litre.

Access-A-Bus Trip Details

Access-A-Bus trip details are tracked monthly to provide an indication of efficiency in Access-A-Bus usage and booking. In April 2018 Access-A-Bus completed a scheduling software upgrade and process improvement review. After introducing these new, standardized processes, scheduling effectiveness has improved. These changes resulted in statistics such as the number of trip cancellations, no shows and errors, being recategorized and therefore, may not be comparable with prior years.

During a more recent review of the reporting processes for Access-A-Bus it was determined that further revision to the reporting categories would more accurately reflect the service and passenger experience and would better align with the key performance indicators. The category previously reported as “Waitlisted” will be reported as “Not Provided” and includes requested trips that could not be provided over the year. Those trips that were previously reported as “Not Provided” were erroneous and are now removed from the requested trip totals. A new category has been included; “User Trip Refusals” and includes any trips where the customer declined a booking that was offered within a half hour of their desired trip time. Analysis and interpretation of the new data set resulting from the 2018 software upgrade is ongoing. Partnership with the vendor continues and may result in future reporting changes, all in an effort to convey the most accurate and meaningful performance statistics possible.

In 2019/20, 3576 fewer trips were operated than in 2018/19, a decrease of 2.2%. The trips that were not provided increased 12.7%, compared to the previous year.

Prior to the impacts of COVID-19 Access-A-Bus trips operated were on pace to increase by 0.4%.

Bus Stop Accessibility

During 2019/20, 158 bus stops underwent infrastructure changes or improvements.

4 existing stops were upgraded or improved

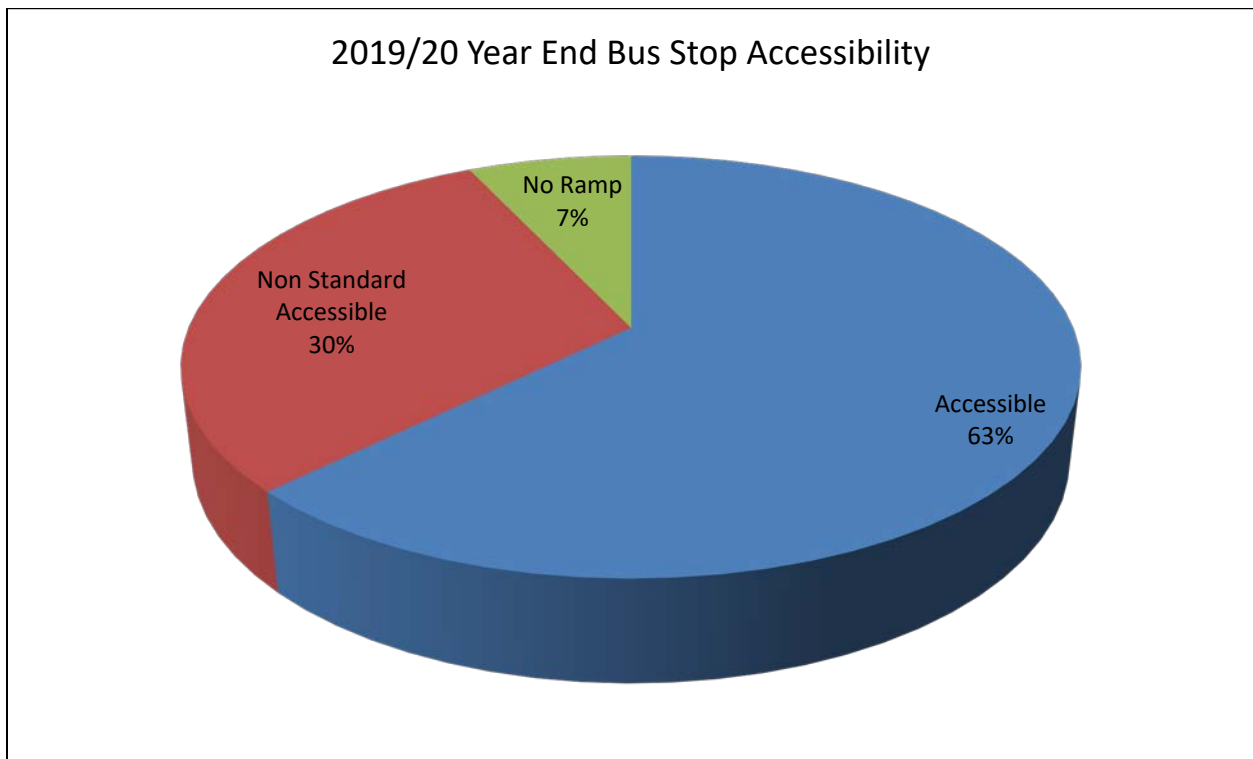

- 2 were upgraded from 'non-standard' to 'accessible'
- 1 'accessible' stop underwent improvements and remained 'accessible'
- 1 'non-standard' stop underwent improvements and remained 'non-standard'

154 new stops were installed

- 42 'accessible' stops were installed
- 7 'non-standard accessible' stops were installed
- 105 'non-accessible' stops were installed

70 existing stops were removed as a result of service changes

The graph below depicts the current state of accessibility for all stops in the network.

Note: Non-Standard Accessible stops do not meet Halifax Transit's accessibility standard; the ramp can be deployed and used at the customer's risk. The majority of the No Ramp stops are located in areas without sidewalks and with narrow shoulders.

Service Utilization

Automatic Passenger Counter (APC) data is now being used to report bus passenger boardings. The APCs provide data within a 90% degree of accuracy. Boardings by Route demonstrate passenger usage over the past year. APC data has been collected since September 2016. The standard deviation is included to demonstrate the degree of variance in boardings from the daily average passenger count.

As large-scale service adjustments were implemented mid third quarter, on November 25, 2019, some routes have since been discontinued. Instances where route numbers have been reused post implementation are labelled 'old' versus 'new'.

Boardings

In 2019/20 average weekday boardings were 99,320 ± 17,512 (17.6% variance). Average Saturday boardings were 56,643 ± 9,986 (17.6% variance). Average Sunday boardings were 39,307 ± 7,334 (18.7% variance).

Prior to the impacts of COVID-19 average weekday boardings were on pace to be 102,303 ± 11,623 (11.4% variance). Average Saturday boardings were on pace for 58,221 ± 6,753 (11.6% variance). Average Sunday boardings were on pace for 40,429 ± 5,254 (13% variance).

Monthly Boardings

In March 2020 rapid service reductions were implemented in response to the COVID-19 pandemic. Significant declines in ridership were observed as well as reduced Bus Operator availability. Passenger boarding data by route became unavailable after March 23rd, due to technological constraints and therefore boardings from this date, until the end of March have been estimated based on March 20 boarding data.

Annual Average Daily Boardings

Passengers per Hour

Passengers per hour measures the volume of passengers carried per service hour by route. Due to differences in service model/design, Express Routes are measured instead by passengers per trip. Conventional route targets vary by time of day and are not illustrated at this time as data is being presented over the entire service day only. Express routes have a ridership target of 20 passengers per trip, while Regional Express Routes have a target of 15 passengers per trip.

Weekday boardings and hours data was not available after March 20th, averages below for 2019/20 are based on data up to March 20th. Saturday and Sunday averages include data up to March 31st.

Annual On-Time Performance

On-time performance is a measure of route reliability and is tracked monthly to demonstrate schedule adherence across the network of routes. Terminals and select bus stops along each route are classified as timepoints and have assigned and publicized scheduled arrival times. On-time performance demonstrates the percentage of observed timepoint arrivals that are between one minute early and three minutes late.

Transit industry standard targets for on-time performance tend to range between 85% and 90%, although service types are not always comparably grouped, nor are schedule adherence definitions consistent between agencies. Halifax Transit will analyze on-time performance across the network in order to establish a benchmark and target for the minimum percentage of trips to depart on time.

Improvements to On-Time Performance have resulted from reduced traffic congestion due to COVID-19. Impact to the overall annual average On-Time Performance however, is minimal, due to the late onset in the last few weeks of the fiscal year. Prior to the onset of COVID-19, On-Time Performance was on pace for 77% for the year. The annual average for 2019/20 remained consistent at 78% compared to 2018/19. This included the implementation of new routes in November 2019, some of which were on new streets where previous transit data was unavailable.

Talk Transit Demographic Information & Results

Halifax Transit Ferry Services Survey – February 2020

The Halifax Transit Ferry Services survey yielded 551 responses total.

See below how respondents self-identified in terms of demographics. Note that demographic questions were optional and some respondents chose not to respond to these questions.

Self-Identification	Number of Respondents	Percentage of Respondents
Aboriginal	7	1%
Disabled	34	6%
Visible Minority	9	2%
Male	75	14%
Female	98	18%
Other Gender	2	0%

A total of 357 respondents (65%) did not provide an age

Ferry Services Survey Results

Highlights

- The majority of respondents typically do return trips on the ferry.
- Many residents noted that the bus and ferry connection needs to improve.
- Some participants encouraged the improvement of Woodside ferry terminal including escalators, elevators, and overall design.
- A large number of respondents expressed the desire for longer ferry service hours including night and weekend service for Woodside ferry.
- Many residents also wish for ferry services in additional locations.
- 99.3% of respondents rated their experience with the ferry as excellent or good and repeatedly noted how friendly ferry staff are.

How often do you ride the ferry?

Which ferry route do you take most often?

- Alderney/Halifax Route (56.1%)
- Woodside/Halifax Route (36.43%)
- I take both routes equally (7.47%)

What is your primary reason for taking the ferry?

- Work (60.47%)
- Entertainment such as restaurants, bars, and events (17.3%)
- School (10.02%)
- Daily errands, shopping and appointments (5.46%)
- Visiting friends and family (4.01%)
- Other (2.73%)

When do you typically ride the ferry?

- Weekday commute hours (7 a.m. - 10 a.m. and 3 p.m. - 6 p.m.) (52.0%)
- Weekends (21.81%)
- Evenings (after 6 p.m.) (15.05%)
- Weekdays (10 a.m. - 3 p.m.) (11.1%)

How do you get to the ferry?

- Bus (30.42%)
- Walk (29.36%)
- Drive alone and use the Park & Ride (18.51%)
- Get dropped off (10.85%)
- Bike (5.66%)
- Carpool and use the Park & Ride (3.07%)
- Other (1.89%)
- Motorcycle (0.24%)

If you drive to the ferry terminal, what is your main reason for driving instead of taking the bus?

- It is faster and more convenient to take my car (55.56%)
- I do not live close to a bus route (15.11%)
- The bus doesn't come at the right times (9.78%)
- The bus connection to the ferry schedule is difficult (9.78%)
- The bus doesn't often enough (9.33%)
- I have mobility issues that prevent me from using the bus (0.44%)

Ferry Services Survey Results: Park & Ride

Highlights

- The majority of respondents commented on the lack of availability at both Alderney and Woodside Park & Ride lots and desired consistent guaranteed parking availability.
- Many respondents noted that the Woodside Park & Ride lot is full before 8 a.m. and the majority of the lot is used by non-ferry users. Snow removal was also noted as an issue for space in the winter.
- Some felt that Alderney Park & Ride was too far from the actual ferry terminal.
- Overall, residents are in favour of a free Park & Ride system.

Are you aware of how ferry terminal Park & Ride facilities work?

- Yes, I am aware (51.5%)
- No, I am not aware (29.32%)
- I am somewhat aware, but could use more information (19.17%)

Based on your experience or knowledge of the Alderney ferry terminal Park & Ride facility, please rate the availability of parking.

- I am not able to easily find parking at the Alderney ferry Park & Ride (49.15%)
- I am able to easily find parking at Alderney ferry Park & Ride (36.44%)
- I have never found parking at the Alderney ferry Park & Ride (14.41%)

Based on your experience or knowledge of the Woodside ferry terminal Park & Ride facility, please rate the availability of parking.

- I am able to easily find parking at Woodside ferry Park & Ride (59.69%)
- I am not able to easily find parking at the Woodside ferry Park & Ride (35.08%)
- I have never found parking at the Woodside ferry Park & Ride (5.24%)

How could a ferry terminal Park & Ride encourage you to incorporate transit or ferries as part of your trips?

- Consistent availability of parking spaces (46.04%)
- Better communication about how Park & Rides work (20.2%)
- Pre-paid passes with guaranteed parking availability (19.44%)
- Daily or weekly parking rates instead of monthly passes (11%)
- Parking spaces closer to the ferry terminal (3.32%)

Ferry Services Survey Results: Cyclists Satisfaction

Highlights

- The overwhelming majority of respondents felt that increased security and surveillance for bike racks were needed to prevent bicycle theft.
- Some participants suggested an indoor, secure bike lock-up room within terminals.
- A few respondents felt that additional and better bike rack designs would also assist cyclists and provide more room for bike parking.
- One respondent suggested a change room for cyclist commuters.
- The lack of bike lanes to Woodside Terminal discouraged some respondents from cycling to the ferry due to safety concerns.

Rate your satisfaction with bike parking at ferry terminals

Very satisfied (14.63%) Satisfied (29.27%)
Somewhat dissatisfied (43.9%)
Dissatisfied (12.2%)

Travelling by bicycle to the ferry terminal:

61.7%

Bring their bike on the ferry and keep biking on the other side

17%

Take their bike on the ferry and park on the other side

12.8%

Park their bike at the terminal before getting on the ferry

8.5%

Don't take their bike

From the list below, which two changes to bike parking at ferry terminals would you like to see?
