TRAFFIC COLLISION DATA SET

A new dataset on traffic collisions is now available as part of an ongoing commitment to providing public

access to data created and managed by the municipality. This dataset includes all collision data from 2018 to the present and is used to understand where collisions happen, and what conditions lead to collisions at particular locations. This information allows the municipality to target countermeasures in the

January 2021

areas that need them most to help prevent fatal and injury collisions for all road users.

The open data initiative was first launched in early 2014 to help improve resident engagement and enhance transparency on municipal data. For more information on the municipality's open data program, and to access all the data sets, please visit <http://catalogue-hrm.opendata.arcgis.com/>

Further, the municipality is committed to building healthy, livable communities, where necessary health products are easily available for people who menstruate.

The changes reduce or restrict the availability of commuter parking permits for the months of December, January, February and March.

Please note that the restrictions do not apply to those wishing to purchase residential permits.

Commuter permit restrictions are on the following streets:

Be sure to check signage before parking. It is the responsibility of motorists to check the installed signage on Rainnie Drive with this change.

WINTER COMMUTER PERMIT PARKING RESTRICTIONS

There are monthly commuter parking permit restrictions on a select number of downtown streets for the winter 2020/21

season. These restrictions are in effect from November 15th, 2020, to March 15th, 2021.
