102	2021-11-29 19:03:16	Yes	B3z3w9	Yes	Yes	No	My concern is the integrity of the people involved that made a decision to break all the promises to the surrounding communities when this system was put in place. Apparently legal contracts and promises mean nothing to HRM council. Shame on everyone who votes to change the terms of the original agreement. Obviously you have no honour.

165	2021-11-25 11:09:27	No	B2X2H6	Yes	Yes	No	These "mitigations" are administrative controls, the second-least-effective in the hierarchy of risk management. These staff job is to collect garbage; they want to be in-and-out ASAP, so their adherence to these controls will be weak. Also, the description is purposefully misleading - it's actually a traffic increase of 50% (17-20 becomes 25-30). So it is 50% increase in risk.

If extra staff (traffic spotters) will be employed to mitigate this risk, why bother? Doesn't sound like it will be saving the taxpayers any money, and if it does, it will be at the cost of employee safety.

We have a state of the art facility and we are proud of it, it should remain the same. You can see how many households put out an atrocious amount of garbage and no recycling which tells us that there are lots of unacceptable products

We need a ramp to the highway to get this scrap off the 333. Tourists don't need this. Emergency vehicles don't need this. Commuters paying taxes don't need this. We are done. Our deal ends at 25yrs. Go somewhere else with your poison.

Also, it is already indicated that blown litter is an issue as it has to be collected daily so the plan is to make it worse and then have someone spend more time picking it up outside when they could do it at the already established FEP/WSF inside.

When trucks are dumping into a cell they may be higher than the fence, and winds can carry debris over the fence. Wind breaks (portable perhaps), adjacent to the truck dump site may be more effective in reducing airborne litter. However, I am not convinced that either, or a combination of these measures will be able to control litter.

You may have workers picking up litter at the facility, but what about the litter that has already blown into the surrounding forest and area? For example, if there is a wind storm in the night, and trash gets blown away, it will be gone before ur workers can pick it up

1881	Email/Mail-In	No	B3T2J8	Yes	Yes	No	Currently there is much litter along Highway 333 that is not being collected, much of this comes from trucks carrying litter. Additional fencing will not alleviate this problem the change proposed will lead to more litter.

7	2021-12-04 11:44:01	No	B3L4B2	Yes	Yes	No	Lifting FEP/WSF is a leap of faith. Maintain the current system that has worked so well
12	2021-12-03 22:10:00	No	B3Z2B3	Yes	Yes	No	I like the use of falcons, but they should be used in addition to the already in place FEP/WSF. The mitigation measures are not as effective as maintaining the FEP/WSF. This survey is not actually a balanced survey. It only presents the HRM/Staff/Mirror perspective as evidence and none of the concerns of the Community Monitoring Committee or others.

14	2021-12-03 20:49:08	Yes	B3T1T4	Yes	Yes	No	Minimizing the size doesn't reduce the attractiveness to birds. If they can smell the food they will be there and then it is a learned behaviour until there is consistently no food for them. Again, this is already a problem and the plan is worse when we already have the FEP/WSF which helps mitigate.
15	2021-12-03 21:32:54	Yes	B3T2E6	Yes	Yes	No	You have acknowledged there is a medium risk what is the predicted effectiveness of the measures you describe here

17	2021-11-11 16:41:08	No	B3L3H5	Yes	Yes	No	Why spend money on mitigation efforts after the fact when you already have the tools to prevent them with the FEP/WSF? Also no thought given to the potential return of ICI waste to the landfill, a move that would increase the problem exponentially.

Perhaps rather than wasting time and money to try and break your promise, and have us all spend our time filling out this incredibly skewed survey you could just do what you promised you would do in the first place.

Respondent	Start Date	Do you live within 5 km of the FEP/WSF?	Please provide your postal code. E.g., A1A2B2	With respect to the proposed deactivation of the Otter Lake FEP/WSF, do you have concerns regarding potential negative impacts?	Are you concerned with the delivery of rodents to the disposal area?	Do these mitigation measures address your concerns?	If No, please indicate why these mitigation measures do not address your concerns and/or any additional concerns you may have with this specific item (400 character limit):

7	2021-12-04 11:44:01	No	B3L4B2	Yes	Yes	No	A commitment to the community was maintained for FEP/WSF. It has worked well and should be maintained.
12	2021-12-03 22:10:00	No	B3Z2B3	Yes	Yes	No	Baiting means poisoning which endangers other parts of our ecosystem, which is already in deep crisis. Never bait. Poison baiting endangers falcons as birds also eat the bait. But baiting also endangers other birds of prey which eat rodents. The mitigation measures are not as effective as maintaining the FEP/WSF.

14	2021-12-03 20:49:08	Yes	B3T1T4	Yes	Yes	No	A baiting program is bad for the environment as the dead rodents will be eaten by scavengers and any still alive may be preyed upon. This will lead to bioaccumulation in predators and a poisoning of the local food chain. Again, this would be making the problem worse when we have a FEP/WSF established to mitigate.
15	2021-12-03 21:32:54	Yes	B3T2E6	Yes	Yes	No	So your response to potential rodents is to put down poison and attractants?

17	2021-11-11 16:41:08	No	B3L3H5	Yes	Yes	No	Why give rodent population a chance to grow when you already have the FEP/WSF to prevent a problem in the first place? Also no thought given to the possible return of ICI waste to Otter Lake and the effect that will have on the rodent population.
18	2021-12-03 20:43:54	No	b3t2c8	Yes	Yes		Unclear of what a baiting program entails and if it poses a risk to other animals. Safety of wildlife should be a priority as well.

81	2021-12-01 05:17:42	No	B3T1Y3	Yes	Yes	No	Once again we create a feeding site then want to kill all the extra animals that come there. Have you given any thought to how this really doesn't manage the problem, you feel that trapping and baiting works. The grocery stores can't even keep them away or high density population areas. Why do you feel that you can control it you're not not realistic

84	2021-11-30 20:19:47	Yes	B3T0J3	Yes	Yes	No	Rodents will travel outside the landfill disposal area and spread to neighbouring communities. More information is needed on exactly what the plan would look like, both on roll out and general upkeep/inspections.

281	2021-11-20 14:33:02	No	B3T1X2	Yes	Yes	No	Baiting programs are ineffective at controlling rodent populations. In any unmonitored ecosystem filled with unnatural/human waste, more rodent populations will thrive, creating a hot spot for diseases.

289	2021-11-19 22:45:53	No	B3t1w5	Yes	Yes	No	There has been a significant rise in rodent activity in part due to the reduced restaurant activity and easily accessible garbage. I believe that the proposed changes will only provide a more easily accessible source of food.

297	2021-11-19 17:40:58	Yes	B3t2l6	Yes	Yes	No	No changes should occur to waste management as people have bought homes in areas with the undeterr tree and I g that it would always be managed as it was originally set up

302	2021-11-19 14:41:19	Yes	B3T1R5	Yes	Yes	No	The increase in rodent population is becoming urban/suburban/rural issue. The green bin program has brought pest into homes and other areas in our communities. The suggestion that by allowing more organic into the stream will not increase the rodent population, disease spread to other animals flies in the face of logic

Respondents outside of 5km of FEP/WSF Based on Postal Code - Survey Responses to Delivery of Rodents to the Disposal Area							
Respondent	Start Date	Do you live within 5 km of the FEP/WSF?	Please provide your postal code. E.g., A1A2B2	With respect to the proposed deactivation of the Otter Lake FEP/WSF, do you have concerns regarding potential negative impacts?	Are you concerned with the delivery of rodents to the disposal area?	Do these mitigation measures address your concerns?	If No, please indicate why these mitigation measures do not address your concerns and/or any additional concerns you may have with this specific item (400 character limit):

428	2021-11-16 05:15:53	No	B3t1r8	Yes	Yes	No	Rodents are incredibly smart and multiply quickly. Whatever trap is used in the beginning, the rodents will eventually outsmart and then a new trap will have to be developed which will cost more money.

439	2021-11-15 20:24:57	Yes	B3T1C4	Yes	Yes	No	THIS will not be enough to deter a large increase in rodents which is inevitable. Baiting program not enough
442	2021-11-15 20:01:15	Yes	B3j1b6	Yes			
443	2021-11-15 19:21:38	No	B3T1R4	Yes	Yes	No	Once rodents are established in a specific area where food waste is present it is nearly impossible to get rid of them.
444	2021-11-15 19:19:56	Yes	B3T0C5	Yes	Yes	No	This is an absolute joke and betrayal of the community that has hosted this landfill for years...it is considered a world class facility and should be maintained as such...a couple questions into the survey and you can tell how biased it is already....

457	2021-11-15 17:07:16	No	B3T1S7	Yes	Yes	No	It is difficult to appreciate how no increased rodent activities can be a potential given the nature of the change. Other hrm rodent control measures have proven only to have moderate success in much less prone areas. Baiting in a plethora of organic food will have limited effectiveness
459	2021-11-15 16:33:39	Yes	b3t1n1	Yes	Yes	No	Rats have been an ongoing issue in the BLT community for several years now. A baiting program is not going to sufficiently control the problem. Rats carry diseases and there are many pets in this area that are susceptible to illness because of rodents
460	2021-11-15 15:34:49	Yes	B3T1V2	Yes	No		
463	2021-11-04 13:14:52	Yes	B3T1A4	Yes	No

468	2021-11-15 14:28:53	No	B3T1T5	Yes	Yes	No	You plan to implement a baiting program? Wow. Maybe just don't deactivate the FEP/WSP (which was supposed to be kept in place as per the contract). Why is this even being proposed? Part of the reason the community agreed they were ok with waste management site was because of the FEP/WSP and now you just plan to take it away?
469	2021-11-15 14:37:16	Yes	B3T1R8	Yes	Yes	No

476	2021-11-15 11:06:37	Yes	B3T1A2	Yes	Yes	No	Not really because rodents are not stupid, they adapt & learn, and if no one is policing what is actually being dropped at the facility there is bound to be an increase in rodents & smells.
477	2021-11-15 11:09:54	No	B3t1z9	Yes	Yes	No	Med risk to high
478	2021-11-02 15:44:15	No	B3t1z9	Yes	Yes	No	Mmmm
479	2021-11-15 10:58:42	Yes	B3T1A5	Yes	Yes	No	Timberlea has a rat problem now. They come down the waterway from the landfill looking for food. It will only get worse.
482	2021-11-15 10:47:45	No	B3T2L1	Yes	Yes	No	Medium risk too high
483	2021-11-15 10:38:04	No	B3t1z9	Yes	Yes	No	Med risk to high, should be no risk
487	2021-11-15 08:33:12	Yes	B3T2C8	Yes	Yes	No	Baiting on site is a band-aid and we all know it. There are ALREADY rats in the 5km perimeter. Any potential for increase is unacceptable. Plus, baiting will target non-rodent life and I have a large issue with that also.
488	2021-11-15 09:26:01	No		Yes			
490	2021-11-15 08:50:46	Yes	B3T1C2	Yes	Yes	No	When we met with the city prior to the installation of this waste facility, we were given promises regarding capping the cells, sorting waste, no odor, etc. We have Rodents now, what you are proposing will make it worse. Is a promise made to residents not binding on future Municipal Governments??
491	2021-11-15 08:35:24	No	B4A0G5	Yes	Yes	No	Rats and rodents often do not stay contained to the dump location; they often will travel into the surrounding community. Not removing organic matter will encourage more rodents onsite
492	2021-11-15 08:16:23	No	B3T1W2	Yes	Yes	No	Uncomposted Organics should NOT be going into landfill. PERIOD!
493	2021-11-15 08:06:45	Yes	B3P2S2	Yes	Yes	No	Keep the FEP/WSF. Do not deactivate.
494	2021-11-15 07:51:27	Yes	B3T1R3	Yes	Yes	No	Rodent control at that level is impossible. There will always be a rodent population that will expand out from the waste area.
496	2021-11-15 06:25:23	No	b2y2k5	Yes	Yes	Yes	Moving backwards and adding a band aid is not a solution. "Let's kill the creatures that WE attract!!" Lovely!! NOT!!! It's inhumane!!

503	2021-11-14 22:48:09	Yes	B3T1T3	Yes	Yes	No	Rodents are prolific & maximum removal of food items from waste to keep ahead of multiplying rodents.
504	2021-11-14 23:28:13	Yes	B3t1s4	Yes	Yes	No	Because there will be additional food waste in the landfill and they WILL cause an increase of rodents in the area... If they learn to avoid the landfill, they will go to different areas in the community

507	2021-11-14 21:08:08	Yes	B3Z2R2	Yes			
508	2021-11-14 18:53:01	Yes	B3T1N2	Yes	Yes	No	Suggesting some baitboxes are an adequate counter measure is absurd. Relatively clean commercial businesses often struggle for years with rodent issues. To suggest some baitboxes can deal with this at something like a dump is a joke.
509	2021-11-14 19:24:07	Yes	B3T1P3	Yes	Yes	No	The presence organics will multiply the rat problem
510	2021-11-14 19:06:31	No	B3z2j2	Yes	Yes	No	Why change what has already been working in Hope's that the mitigation measures will prevent issues? What if it doesn't.
511	2021-11-14 18:40:50	Yes	B3T2E1	Yes	Yes	No	Any increase in rodents will only make it worse
512	2021-11-14 18:24:35	No	B3z1c5	Yes			
513	2021-11-14 17:48:16	Yes	B3t1C4	Yes	Yes	No	Timberlea already has too many rats this will cause so many more.

521	2021-11-14 16:13:51	No	B3t2h8	Yes	Yes	No	These claims cannot be substantiated
522	2021-11-14 15:41:54	No	B3Z1X7	Yes	Yes	No	People are putting things in their garbage bags that don't go there. You can't assume everyone is being diligent about that. You get rid of the front end, there will be MORE rodents and other wildlife.
523	2021-11-06 17:49:33	Yes	B3T1R3	Yes			
524	2021-11-14 15:16:45	Yes	B3T1A5	Yes	Yes	No	Timberlea is already full of rats. They are running around the neighbourhood getting into houses & sheds. We don't want more rats, get rid of them!!!

529	2021-11-14 12:32:35	Yes	B3T1T7	Yes	Yes		Again you are expecting an increase in rodents. Doesn't take much to trigger a population explosion and increased risk beyond site.

543	2021-11-14 07:47:50	Yes	B3T1V2	Yes	Yes	No	Baiting is putting toxins ( bait) into the surrounding area affecting water quality as well as other predatory animals that will feed on the dead rodents and spreading the poison further away from the landfill facility to adjoining communities
544	2021-11-14 07:20:45	Yes	B3T1A7	Yes	Yes	No	BLT is already ridden with rodents. Deactivation will make it worst
545	2021-11-13 19:53:48	Yes	B3T0B6	Yes	Yes	No	What is currently being done is not sufficient

588	2021-11-13 12:12:35	Yes	B3T1W2	Yes	Yes	No	More baiting is the mitigation strategy? Empty, hollow, and simply adds more poison to the environment. The front end processing works and does not rely on poison and trapping.
589	2021-11-13 12:34:33	Yes	B3T1P7	Yes	Yes	No	There is still a high potential for additional rodents to be present in the area where there is already a problem even with the current mitigation measures.

If the FEP/WSF is still in operation, additional rodents would not be attracted to the site in the first place, and additional mitigation measures would not be required. If a rodent population does become established should the FEP/WSF be shut down, and other measures are then used to deter them, the rodents will then move on to other areas.

840	2021-11-10 09:18:17	Yes	B3T0J7	Yes	Yes	No	The last thing neighbours need is the possibility of more rats running throughout the neighbourhood. Halifax City has enough rats for Timberlea and area. To save a measly 2 million dollars to add rats, gulls, maggots, flies and the like is a pathetic attempt to increase the bottom line.

986	2021-11-09 07:12:32	Yes	B3T2K5	Yes	Yes	No	Baiting may limit the population, but it's not an overall effective process to limit rodents. We live very close to the landfill and have many rodents in our yard. We used a commercial pest control provider but after a full year it did nothing to reduce their presence. 1113	2021-11-08 08:14:20	No	B3Z2X3	Yes	Yes	No	Use of poisons impacts unintended species. Rats have increased in numbers since the dump was created and have been an issue for many BLT residents for years. Lessening the sorting can only increase the problem

1115	2021-11-08 07:46:17	Yes	B3t1v4	Yes	Yes	No	Despite baiting program, the concern is around what is bringing the rodents to the landfill in the first place. Ideally, waste should be processed so there is no food/other waste that is attractive to animals/birds. Need to proactively prevent animals from being attracted to the landfill as opposed to reactively trying to drive them away.

1524	2021-11-04 15:42:58	No	B3z1G1	Yes	Yes	No	I lived in timberlea from [REDACTED] and there was a steady increase with rodents. So when they are run out of otter lake, they go elsewhere. The bird of prey have substantially increased over the years too which is good but if rodents are poisoned then eaten by prey, it can significantly impact them.

1535	2021-11-04 14:35:55	No	B3T1V7	Yes	Yes	No	Without proper sorting there will be more for for rodents. I don't believe your above mentioned solutions will handle the problem.
1536	2021-11-04 14:43:19	No	B3T1S5	Yes	Yes	No	Same as previous question - getting rid of FEP/WSF will increase the amount of food waste and rodents will find their way to the landfill.
1537	2021-11-04 13:01:53	No	B3T2G5	Yes	Yes	No	Again, the cost of an adequate rodent disposal system will likely be more than the government is willing to pay. In addition, everywhere I know has a rodent mitigation system in place and they still have rodents. This will just make it worse. From restaurants to hospitals, anywhere you don't want rats, there are mitigation systems and yet the rats are still there.
1538	2021-11-04 14:25:53	Yes	b3t1c9	Yes	Yes	No	Rodents bring disease and I am not confident that the theoretical baiting program will offset the total increase of rodents and would need to see more data to support this

1541	2021-11-04 13:53:56	Yes	B3T1C4	Yes	Yes	No	Baiting on-site will have some effect, the degree to which that will be efficacious is speculative.

1883	Email/Mail-In	Yes	B3T0H3	Yes	Yes	No	Statement refers to "delivery of rodents". Exposure of trash will attract rodents. Greater breeding/increased number potential for spreading to outlying areas/housing.
1884	Email/Mail-In	Yes	B3M4M8	Yes	Yes	No	Baiting is an attempt to control rodents will not be effective. Elimination of a food source (i.e. removal of potential food sources) is the only proven method. As a worker in the Halifax food/restaurant industry I have had to deal with rats and mice in the workplace. Traps and poison baiting DOES NOT WORK. Removal of their food sources like trash food waste is the only proven method.
1885	Email/Mail-In	No	B3Z3T6	Yes	Yes	No	Does the baiting of rodents actually keep them away or attract them to the bait stations?
1886	Email/Mail-In	Yes	B3T1B9	Yes	Yes	No	Redundant. We should have a regular culling program to eliminate all rodents, rather than trapping and moving.

Keeping the trucks of these roads is the only way to truly address this issue. More concerning is tracking garbage on these gravel roads and it it ground in --- further attracting undesirable critters.

125	2021-11-27 10:01:50	Yes	B3T1S6	Yes	Yes	No	One of the most important outcomes of COP26 was a pledge from the EU and the US to reduce methane production. Arguing that eliminating processing of < 150 mm size organic materials "will not greatly increase" greenhouse gas production is disingenuous in that the phrasing attempts to discount a real concern. I suspect there is more public support for improving the facility.

There are numerous locations where those wells are present and they still stink from miles away - the reason - organics in the waste stream. Keeping the diversion in the FEP/WSF mitigates the amount of gasses produced so they may be more appropriately handled by the collection system down the road.

900	2021-11-09 17:14:50	No	B3T1W5	Yes	Yes	No	People already have enough trouble sorting their garbage and food waste. This end to front end processing will undoubtedly mean that waste that should not go into the land/fill will end up in there. The promise was made to keep the front end processing when this landfill was proposed, and again since then. Why don't you stop wasting our money and time and just do what you said you were going to do.

935	2021-11-09 08:42:24	Yes	B3T1R5	Yes	Yes	No	The GP do not recycle properly/compost properly which will cause more gasses to accumulate. if you are worried about the expense of the electricity being used you should think about installing wind turbines and or solar to capture renewable power. Further more if government took back the electricity company then we the public would not have to pay out huge bonuses to the CEO of NSP.

Respondent	Start Date	Do you live within 5 km of the FEP/WSF?	Please provide your postal code. E.g., A1A2B2	With respect to the proposed deactivation of the Otter Lake FEP/WSF, do you have concerns regarding potential negative impacts?	Are you concerned with the additional generation of greenhouse gases?	Does the existing approach address your concerns?	If No, please indicate why the existing approach does not address your concerns and/or any additional concerns you may have with this specific item (400 character limit):
		Response	Open-Ended Response	Response	Response	Response	Open-Ended Response
1882	Email/Mail-In	Yes	B3T1P3	Yes	Yes	No	You say not to expect a significant increase in gases. You don't say how much gas contributing material is separated by way of FEP/WSF. When shut down, it is only common sense to anticipate an increase in gas producing material. After all, there are a lot of blackbags with mixed waste getting to landfill NOW. With the increase in apartment and condo living you can expect MORE. If these are the under estimated 8-to-10 loads per day, you will have a bigger problem. THE SAVING IN ELECTRICITY WILL NOT WARRANT.
1883	Email/Mail-In	Yes	B3T0H3	Yes	Yes	No	Organic waste still needs disposal or treatment - regardless of method, poses still presented. Electricity saving is likely negligible.
1884	Email/Mail-In	Yes	B3M4M8	Yes	Yes	No	Offgas production in a landfill is to be expected. With the loss of the WSF you will be increasing the volume of gas production and thereby mitigate any progress towards a cleaner environment.

190	2021-11-25 05:43:05	Yes	B3t1c4	Yes	Yes	No	Odour is a problem in Timberlea and work should focus on addressing this as opposed to seeking savings. HRM continues to increase population close to the landfill, while making decisions based on solutions from consultants that are not focused on protecting reside and relying on proposals that 'may' have the 'potential' to improve issues.

900	2021-11-09 17:14:50	No	B3T1W5	Yes	Yes	No	Currently, with the front end processing in place, the stench is almost unbearable some days. Removing that front end processing will exponentially increased the smells from the landfill. If you think it won't be a problem, perhaps you can move the landfill to Tower Road in Halifax and see how the south enders like it.
901	2021-11-09 17:15:45	Yes	B3t0c8	Yes	Yes	No	I lived close...but not as close as this dump...to the Sackville landfill and it consistently stunk. Now think about this: we can't go on our deck because the air stinks too much. We can't hold at Brunello because the air stinks too much. Resale prices drop...because the air stinks. But you won't be here to deal with it. Is it fine to say MY analysis shows the air will have a major stench?

1056	2021-11-08 14:49:55	Yes	B3T1C4	Yes	Yes	No	The Dillon Review suggests that operation of the FEP/WSF "may increase" the potential for odour issues. This implies they are unsure if that's the case and they won't know for sure until the processes are shut down. That concerns me.
1058	2021-11-08 14:54:19	No	B3T2B2	Yes	Yes	No	The approach doesn't identify a strategy in the case that the WSF creates more odor than anticipated by the Closure Review. Currently on its bad days, especially when the wind comes from the west, it's truly awful.

1113	2021-11-08 08:14:20	No	B3Z2X3	Yes	Yes	No	The dump creates a foul smell in the low lying area along 9 mile river, worse on humid days. Driving through it is unpleasant already and can only be made worse by reducing sorting

1115	2021-11-08 07:46:17	Yes	B3t1v4	Yes	Yes	No	It seems the study conducted has identified this as an issue. As opposed to simply trying to mitigate this, take the steps to proactively prevent it.

1120	2021-11-08 07:36:04	Yes	B3t1m6	Yes	Yes	No	The odours right now can be overpowering. Removing the front end sorting will result in more smell. Leaving the systems in place that work just now makes a lot more sense rather than trying to mitigate these problems with more solutions.

I realize this is a bit of a catch 22, but it still does not address my concerns that it probably won't increase odours. Currently the odours are not a problem, so best case scenario it continues to not be a problem. Worst case it increases odours. I would need to see more evidence that it will not create more odours

1637	2021-11-04 08:01:23	Yes	B3T2L8	Yes	Yes	No	Using words like microbiological stabilization process sounds very scientific but ultimately mean nothing to the public. The will the landfill cover be on the new garbage 24/7? Monitoring for odours is fine but what will you do if it does smell. What are the steps you would take. I don't want my property value going down because the garbage smell comes into our community every day at lunch.

1818	2021-11-03 14:13:18	Yes	B3T1C2	Yes	Yes	No	This will decrease enjoyment of outdoors in our community, golf course and decrease our property values. This was never agreed to. Govt is tarnishing a great history of a successful waste management system with these changes. Completely unacceptable
1819	2021-11-03 13:51:16	No	B3T1S4	Yes	Yes	No	After admitting that closure of the WEP/FEP will likely lead to additional odours, you say that you will continue CURRENT mitigating practices. These practices are not going to mitigate increased odours unless you ramp them up considerably, which will increase the costs. Better to keep the very successful current approach.

1831	2021-11-03 10:57:07	Yes	B3T2L2	Yes		No	At present with the FEP/WSF safeguards in place there are minimal or acceptable levels of odour resulting. Removal of the FEP/WSF processes has been acknowledged as resulting in more odour producing organic materials being deposited in the landfill by a factor of tons. This has the potential to produce an unacceptable level of odours , a level noxious to the adjacent communities .

1866	2021-11-02 16:40:23	Yes	B3T1S5	Yes	Yes	No	Currently there are smells that come from this site, with more organic materials making their way into the site the smell will increase
1867	2021-11-02 14:34:16	Yes	B3T0J6	Yes	Yes	No	How can any environmental inspection company state that no harmful ODOURS will increase when they have no idea what's hidden in the DARK BAGS. Very misleading assumptions. This duty does not state how many complaints Otter Lake Landfill have received since opening its gate. Most complaints of odour actually originate from the nearby COMPOST FACILITY on Prospect Road.

14	2021-12-03 20:49:08	Yes	B3T1T4	Yes	Yes	No	By removing the FEP/WSF you are removing the ability to divert toxic materials such as batteries from the landfill. The best way to prevent a leachate incident is to divert as is the case with organic material and greenhouse gas emissions. In this way FEP/WSF contributes to meeting and exceeding the stringent requirements for groundwater protection. Does the city want another Harrietsfield issue?

This way nothing overly harmful get put in the landfill. Of we are not sorting, the trash going in will most include more harmful chemicals that do not belong in the landfill. We cannot only rely on households to sort their garbage. This landfill is very close to our lakes.

The public will exploit the opportunity to toss anything at Otter Lake as there will be no 1st line of defence in removal of items. 669	2021-11-12 14:09:19	No	B3Z0C8	Yes	Yes	No	The more garbage that goes in the ground the higher the risk is to ground water. With no separation - very bad things end up in the ground. We need to continue to monitor and separate so only what is intended goes into the cells. Saying we will keep the cells small - sure but it you dump everything there will be more cells and more of everything that is bad.

892	2021-11-09 18:48:02	No	B3S0G5	Yes	Yes	No	Without sorting the black bag garbage items such as batteries and paint will be going into the landfill. Lazy people do not sort their garbage and the existing process removes all the potential hazards when their bags go to the processing plant. This prevents leachate going into the water table and then into the wells. Keep the existing process. It seems to be working.

900	2021-11-09 17:14:50	No	B3T1W5	Yes	Yes	No	We pay taxes that include things like sewer/water/sidewalks.....we get none of those. We have to dig wells at our own expense, and hope that all of the rich developers won't build so many houses that our wells go dry or get polluted. Now you want to remove the protections that were put in place so that there is an ever increased risk for groundwater contamination. .

FEP/WSG become even more important as a city grows!

With very few exceptions the people who current live (and those that may potentially live as the city expands) in the area are serviced by individual wells. The elimination of the WSF will undoubtably result in toxic substances entering the landfill. Once the ground water table is contaminated, they will be not way to rectify the problem.

This area has very little surface absorbatent material over bedrock allowing for a large possibility of large runoffs overwhelming the cells.

A small portion of the landfill is not capped as it accepts waste and if this waste contains an increased proportion of untreated organic waste, polluted run off could happen in a catastrophic rain event. I live near the Nine Mile river estuary.

These descriptions are dismissive of concerns and make untenable extrapolations and inferences without any good evidence. This amounts to simply hoping there will be no impacts to surface water and that is not good enough. We swim and boat in the local surface water.

1394	2021-11-05 13:27:14	No	B3T2L2	Yes	Yes	No	Extreme rain events like hurricanes and nor'easters could have a huge impact on the areas surrounding the landfill site, the above approach only monitors groundwater and if an issue is found no mitigating environmental restoration is proposed. Hoping an event won't happen isn't a great strategy here.

The environmental damage this has done to Nine Mile River and Shad Bay is visible to the naked eye. Very large balls of green foam can be seen whenever pumping takes place and the rocks and boulders in river are covered in green slime. Especially when water levels are low in the river as they are in summer. What about the mollusks (mussels) in Shad Bay we haven't been allowed to eat.

What use to be snow, with a slow meltdown, is now rain (global warming) 30 years ago when the landfill was designed, I've lived in a difficult environment. Now with increased unchecked garbage, landfill outdated, you can only expect surface runoff to reach farther than ever.

118	2021-11-28 08:58:19	No	B3T1W7	Yes	Yes	No	You are trying to shortcut safety mechanisms. If there is so little waste, employ the minimum staff as is safe at the FEP/WSF site. What is the cost of that? Numbers of waste mean nothing on their own. The critical information is the cost required to run FEP/WSF compared to the waste. If you were honest with us, you would give us proper cost and risk information to allow for an informed response.

126	2021-11-27 10:57:24	No	B3a2L8	Yes	Yes	No	The spirit in which the agreement was intended still matters, no matter what technicalities the municipality wants to quote to invalidate our concerns. The "education" segment of this survey is very sanctimonious in tone. There must be a better way to allay concerns than to just tell concerned citizens, "actually, you're wrong."

135	2021-11-26 14:00:24	No	B3T1W7	Yes	Yes	No	Frankly, past experience has shown that 'town hall' can't be trusted, and further 'cost-cutting' measures will continue as long as the council members themselves are unaffected.
136	2021-11-26 13:20:12	No	B2W0L2	Yes	Yes	No	From what I read above this still goes against the agreement. It will need to be modified and accepted by community residents to proceed then.
137	2021-11-26 12:19:20	No	B2Y4J5	Yes	Yes	No	You have an agreement; a solid waste design that was a critical component of the agreement. Now you want to change it, to reduce it and make it less effective. The model currently in use for that last two decades has worked. Residents of the area accepted the current landfill based on those conditions WITHOUT complaint. Now change. To save someone (the company) money. Read increase profit. WSP?!

166	2021-11-25 11:51:38	No	B3Z1L3	Yes	Yes	No	Any agreement, even an unjust agreement, can be adhered to with a hard and absolute interpretation. It is not the correct approach. Just because an agreement in law, in theory, cannot be challenged does not preclude it from being overturned should a Court decide that it is now unacceptable in a contemporary setting. What was a legal and social norm in 99 may not be a legal and social norm in 2022

317	2021-11-19 10:51:58	No	B3t2a4	Yes	Yes	No	If you see what people throw out with their garbage (not green bin or recyclable materials), you can see that much of it is biological. Not everyone separates properly. Even if you do, there is still biological material in regular garbage that does not qualify under the current recycling program. Bottom line, HRM made a deal with residents and is breaking a promise.

352	2021-11-17 16:59:54	No	B3T2B7	Yes	Yes	No	An ironclad commitment of minimal untreated organic waste in the landfill was key to community support. It may well be that the agreement did not specifically mention FEP/WSF but this was the underlying understanding at the time. The agreement did not state either that "HRM reserves the right to modify the way the landfill functions if it feels that it can save a few bucks and get away with it"
353	2021-11-17 18:51:05	No	B3T1R7	Yes	Yes	No	it would seem from the report that the primary concern which required maintaining the operation of the FEPWSF was the stream coming from ICI generators. These generators can now dispose of their waste outside of HRM due to a change in regulations, not because they are no longer present in HRM

373	2021-11-17 09:17:34	Yes	B3T1R5	Yes	Yes	No	What you're saying is that, "because we are so good at sorting waste on the home front (we've gotten better, yes), that the need for this agreement and the safeguards it's provides us are no longer needed. Look at Africville an example of past wrongs only to be addressed later to remediate at a much higher cost financially and community trust.

Of course the community will feel the commitment is violated without it. The volumes of material diverted at the front end may have gone down but they aren't eliminated. 801	2021-11-06 14:25:32	No	B3T2J8	Yes	Yes	No	This agreement that was agreed upon in 1999 and should still be binding and remain in place. There was a lot of time and effort put into this agreement by all stakeholders and the decisions should remain in place today. How can you trust future agreements if it can be changed so easily? You are going to lose public trust by breaking this agreement. The cost savings do not warrant the risk.
804	2021-11-10 18:01:15	No	B3T1W9	Yes	Yes	No	Just because the measures may be up to a different standard now than the 90s, the FEP/WSF enhance the waste protocols at Otter Lake and make them a better site than other HRM landfills. Why do we need to go back and change an agreement made in the 90s when it is not doing any harm and has satisfied the community that the landfill impacts the most?

For those who are making these decisions if you lived in this community we do still feel the same way if so perhaps maybe we can move this facility to your community. I mean no disrespect but I am sadly disappointed in those elected officials who are supposed to be supporting our community where are you now?

986	2021-11-09 07:12:32	Yes	B3T2K5	Yes	Yes	No	My concern is the part the operator is playing in this change. If Mirror is able to force this change because they want to protect their own profits, and are using a consultant report they commissioned then maybe it's time to find a new operator. This is a facility that's paid for by our taxes and residents should be determining what goes on there and whether a corporation can force this change.

1401	2021-11-05 12:12:08	No	B3T1Z4	Yes	Yes	No	The landfill was designed to be operated using the FEP/WSF equipment and the municipality committed to the community that the facility operating the facility as designed. You're now changing the design, by removing equipment meant to prevent unwanted waste streams from entering the facility. This goes against the intent and spirit of previous commitments.

No one wants a dump in their own backyard, so if we must live with it, the city needs to continue to protect the surrounding community. This is a 'bait & switch' scenario and the residents will bear the impacts of this decision.

1472	2021-11-04 20:31:23	Yes	B3t0c2	Yes	Yes	No	The life of this facility should be closed by 2024 as originally agreed. The community does not want it here.
1474	2021-11-04 20:14:33	Yes	B3T1P6	Yes	Yes	No	Having been around for the original enforcing of the Landfill on the Timberlea/Prospect Community it was clearly stated that the Landfill will always have access to the FEP and WSF, that at least was stated by many HRM Concillors and Staff, this assurance did minorly calm those living near the Landfill, if this promise is broken it's breaking word and contract and should be fought from all angles
1475	2021-11-04 20:05:11	Yes	B3T1B9	Yes	Yes	No	Not fully if the materials are not sorted as they are currently more unacceptable waste will end up in the cells.

1680	2021-11-03 18:47:54	Yes	B3T1A8	Yes	Yes	No	Although the composting/green been program is successful, There are still many "old school" residents in HRM who do not compost. Therefore the FEP should stay in place. I understand removing the FEP& WSF will save money, however no price can be put on the environmen, its health and the health of everything that lives in it!

It was put in place as a tool and to ensure there would be less pollution and harm done to the community and ecosystems. Now money and politics is more important than sacrificing a agreement and environment.
1715	2021-11-03 20:31:53	Yes	B3T1P6	Yes	Yes	No	Given the community monitoring committee went to the trouble to send a flyer to share their concerns, and given they understand the issue more than us, we do not support this change nor trust any decisions are being made for the community and not the bottom line

You spent tens of thousands to do a community engagement process and you heard clearly the community did not want the agreement dishonoured. This is typical beaurocracy and the community is tired of being under serviced by the municipality.

The soeed of growth in HRM should only determine that the FEP/WSF need to be improved to handle more. I know for a fact that separation by the resident is not always done. This means at the FEP/WSF, the food waste, chemicals, metals, etc. still need to be separated. By shutting down the FEP/WSF we will be facing a toxic site in 20 years to come such as the Sackville landfill witch has to payout surrounding residents for contamination. More separation! Not lles!

As well, maintenance workers would be focussed on ensuring needed equipment is operating as opposed to wasting effort on something that is shut down. Finally, what guarantee exists that this maintenance will continue or what situation would lead to re-opening if deemed required.

More importantly, once the government become accustomed to the lower costs of breaching the commitment, it would be extremely difficult to get the will of the HRM councilors back to do the right thing and honour the original commitment.

1672	2021-11-03 17:32:26	Yes	B3T1C2	Yes	Yes	No	It seems that shutting down will be just as costly as keeping it open. All the extra precautions and scheduled maintenance programs, it might as well stay open. Regular use will ensure that all safety guidelines are maintained as well as properly heated and ventilated areas will ensure that condensation and seizing of machinery and electrical wouldn't be an issue. Better off to keep them open

1882	Email/Mail-In	Yes	B3T1P3	Yes	Yes	No	Equipment is meant to be used, the longer it sits the more foreseeable problems. After all, that's why you spent on maintenance. Due to the expected increase in volume, at some point if it is decided to reactivate, the system will not be sufficient to handle the new work load. By keeping it in operating (FEP, WSF) it can be improved as we grow.
1883	Email/Mail-In	Yes	B3T0H3	Yes	Yes	No	The longer equipment is mothballed, the greater the likelihood of neglect to facilities - as time passes - easier ways of developing things will take place - facilities will deteriorate.
1884	Email/Mail-In	Yes	B3M4M8	Yes	Yes	No	Once shut-down, moth-balled or removed, should the need to reactivate or replace equipment will be far more than the cost of normal operation and maintenance not to mention the delay in getting funding and approval. In the meantime, the environment and health of people and animals in the vicinity of the landfill will be endangered. Is the cost savings of removing the WSF worth that?

This is 2021. In the 22 years since this community agreed to allow the facility to move forward we have learned much. We've done very well, considering. Going backwards is simply the wrong thing to do.

They should be municipal employees as they do not have any stake in the profitability of the system and will be more invested in the long term sustainability for the community. If the PRIVATE operator is too expensive, send it out to tender for a new operator.

Curb side Diversion has been great, but not everyone complies. 2/3 of our waste is now "out of sight" due to loss of Flow Control (and thus revenue). That waste is just being buried so we moved that "problem" out of HRM geographically but it still exists in NS.

It is the stopgap. To stop it is equivalent to stopping medication because you feel better. In 2021 it is negligent to even consider removing an environmental process.

Otter Lake was accepted as a location because of promises about how the landfill would be managed. HRM keep eroding the intent and the agreement with community - we should be looking to do new a better things re waste management not falling back to old "dump" and run. Very disappointing and dishonest.

HRM is attempting to back out of an agreement and in ADDITION to that is trying to convince the residents in this area that backtracking on environmental protections is somehow good for us and in our best interest. It is not. Stop trying to convince us it is. It is in YOUR best interest.

1375	2021-11-05 15:39:22	No	B3T1R6	Yes	Yes	It is time to look for another landfill area. This community has more than held up its end of the bargain. Where and when will this site be closed ?
1376	2021-11-05 15:10:16	No	B3T1S4	Yes	Yes	People will not sort waste to the level needed; safeguards that ensure removal of hospital, industrial and commercial waste will be gone; contaminated pollutions may easily leach into nearby watersheds; odours will increase ..
1378	2021-11-05 15:19:43	No	B3T1Z4	Yes	Yes	Trust! After the fiasco of the disgraceful Sackville landfill/dump, no community anywhere wanted to host a new landfill, which was entirely understandable. The very things you are now proposing to remove (FEP, WSF and community monitoring) were the essential, minimum requirements for community acceptance. They continue to be just that!
1383	2021-11-05 15:07:44	Yes	B3T2J5	Yes	Yes	Local community being thrown under the bus keep present process or move the dump have had to live with the stench when bladders were reopened and recent fire at dump indicates something has changed recently to cause issues. If you can't keep agreement with community find another location to dump your trash.

1394	2021-11-05 13:27:14	No	B3T2L2	Yes	Yes	The intent of the original agreement was clear. The FEP/WSF was the reason the community agreed to the location of the landfill. Changing the terms of the agreement now could leave the HRM exposed to significant legal and financial liability. This could easily offset the savings by shutting down the FEP/WSF. The big picture is easy to see here. Hopefully honour and common sense will win out.

To remove FEP without negative environment impact HRM would be relying solely upon the general public's understanding of waste sorting and disposal, investment into public education must occur if FEP is to be considered for removal.

1882	Email/Mail-In	Yes	B3T1P3	Yes	Yes	This was a big deal several years ago. At that point we could have public meetings. Today you want people to go on a computer. For those we do not have computers, they are at a disadvantage. Throughout this survey, not once has it been layed out just what the FEP/WSF has done or the importance of it, it appears it all comes down to costs of running, and thats what you really want to deter.
