SUBJECT: Halifax Green Network Plan 2021 Progress Report

INFORMATION REPORT

ORIGIN

On August 14, 2018 the following motion of Regional Council was put and passed regarding item 14.3.1:

“THAT Halifax Regional Council:

6. Request that staff provide annual progress reports on the implementation of the Green Network Plan, to Regional Council through the Community Planning and Economic Development Standing Committee.”

LEGISLATIVE AUTHORITY

Halifax Regional Municipality Charter, clause 79A(1)(a), and subsection 229(1)

- 79A (1) Subject to subsections (2) to (4), the Municipality may only spend money for municipal purposes if
- (a) the expenditure is included in the Municipality’s operating budget or capital budget or is otherwise authorized by the Municipality;
- 229 (1) A municipal planning strategy must include statements of policy respecting
- (e) any other matter prescribed by the regulations.

Minimum Planning Requirements Regulations, clauses 6 (g), 8(a), and 9(f), (h)

- 6 A municipal planning strategy may include statements of policy on the use, content, development, and administration of the following:
 - (g) studies to be carried out before undertaking specified developments or developments in specified areas;
- 8 A municipal planning strategy may include statements of policy on any of the following:
 - (a) municipal investment for public and private development and coordinating public programs relating to the economic, social and physical development of the municipality;
9. A municipal planning strategy may include statements of policy on any of the following:
 - (f) stormwater management and erosion control;
 - (h) identifying, protecting, using and developing any of the following:
 - (i) lands subject to flooding,
 - (ii) steep slopes,
 - (iii) lands susceptible to subsidence, erosion or other geological hazards, and

Administrative Order One, *the Procedures of the Council Administrative Order*, Schedule 3, Community Planning and Economic Development Standing Committee Terms of Reference, clauses 3 (a)(e), and section 7:

3. The Community Planning and Economic Development Standing Committee shall provide oversight of the Municipality's Regional Plan and Regional Planning Initiatives, as follows:
 - (a) overseeing the Municipality's Regional Plan and Regional Planning Initiatives;
 - (e) overseeing the priority setting relative to the Community Visioning Program, Functional Plan Implementation and major planning projects.
7. The Community Planning and Economic Development Standing Committee shall perform such other duties and responsibilities as may be determined by the Council.

BACKGROUND

The Halifax Green Network Plan (HGNP) defines an interconnected open space system for the entire municipality, highlights ecosystem functions and benefits, and outlines strategies to manage open space. Specifically, the HGNP provides land management and community design direction to:

- maintain ecologically and culturally important land and aquatic systems;
- promote the sustainable use of natural resources and economically important open spaces; and
- identify, define and plan land suited for parks and corridors.

On August 14, 2018, Halifax Regional Council approved the HGNP. This approval included direction to use the HGNP as a framework for amending the existing Regional Plan and Secondary Planning Strategies and to carry out the actions contained in the HGNP through the multi-year budgeting and business planning process.

As requested by Council, this report provides the third annual progress update on the implementation of the HGNP and summarizes the work that has taken place in 2021 and early 2022.

DISCUSSION

The HGNP includes direction to carry out a total of 79 actions to effectively support the Plan's vision, goals and objectives. The actions generally use one of the four implementation tools identified in Chapter 6 of the HGNP. These tools include land use planning, park management, project work and partnerships. In 2021 and early 2022:

- 24 of the 27 actions identified as "Guidance" (to be used on an ongoing basis) were used to direct municipal operations and decision-making.
- 5 recommended actions with identified timelines have been completed.
- 46 recommended actions with identified timelines are in progress. Many of these actions were intended to be considered through multi-year projects that were already planned or underway at the time of the adoption of the HGNP, such as the Regional Plan Review, Plan & By-law Simplification Program, Municipal Design Guidelines (Red Book) Update, and ongoing park planning initiatives. Work on these various projects continued to move forward in 2021 and the recommendations of the HGNP have continued to inform their direction.
- One recommended action with an identified timeline has not yet been initiated. This action is dependant on the results of other actions currently in progress.

An update on the status of each of the HGNP action items is included as Attachment A. A summary of the updates based on the four implementation tools is provided below.

Land Use Planning

The HGNP recommends 27 actions that provide guidance and specific instructions on amendments to the Municipality's various planning documents, including the Regional Plan, the Regional Subdivision By-law, and the various secondary plans and land use by-laws. The majority of these amendments were identified for consideration as part of the Regional Plan Review, which is currently underway and anticipated to be completed in 2023, and the ongoing Plan and By-law Simplification Program.

The following provides a summary of the work completed in 2021 on the land use planning initiatives related to HGNP actions:

- Centre Plan Package B was approved by Regional Council on October 26, 2021. The recommendations of the HGNP were considered during the development of the Centre Plan. The approved Plan includes policies for the Regional Centre that identify wetlands, establish standard watercourse setbacks and coastal elevations, identify landscapes of cultural significance, establish shadow performance standards for identified parks, require a land suitability and parkland analysis for Future Growth Nodes, consolidate park policies and zones, permit the keeping of hens and urban agriculture in all zones, permit edible landscaping, prohibit certain invasive and highly toxic species, and identify a need for the Regional Centre Park and Open Space Plan.¹
- The Regional Plan Review's Themes & Directions Report was released on May 20, 2021. The Report shared ideas about key planning issues and provided details of the work that will be completed during the Review. This included outlining the proposed approach to how the recommendations of the HGNP will be considered as part of the Regional Plan Review. Public engagement opened following the release of the report and ran until July 16, 2021. A What We Heard Report providing an overview of the feedback reviewed and next steps for the Review was released on December 14, 2021.² The Phase 3 Report was released on July 12, 2022 and includes

¹ More information on the Regional Centre Plan is available at <https://www.halifax.ca/about-halifax/regional-community-planning/community-plan-areas/regional-centre-plan-area>

² More information on the Regional Plan Review is available at <https://www.shapeyourcityhalifax.ca/regional-plan>

proposed amendments that will require the policies and principles of the HGNP to be considered during discretionary planning applications and during plan amendment processes.³

- The final draft of Sharing Our Stories is currently being prepared for public engagement. The draft includes actions related to the prioritization and protection of cultural landscapes and archaeological resources. It is anticipated that Sharing Our Stories will be considered by Regional Council in 2022.⁴

Park Network Management

There are 22 actions related to park management that support the HGNP's goals and objectives. The following highlights examples of how the HGNP is being integrated into municipal programs and projects:

- HGNP guidance was used in the development of park plans, such as the inclusion of food supportive amenities (community gardens and others), year round recreation opportunities, public art, and wayfinding. This guidance was considered in plans for the Halifax Common, Rehab Lands, and Bedford West and upgrades to existing parks.
- Policy recommendations regarding park management, including the adoption of a parks spectrum, which reflects the Municipality's role in providing a full range of outdoor recreation experiences, and an approach to the protection of wilderness areas, are being considered as part of the ongoing Regional Plan Review.
- Asset registry work is underway to identify outdoor recreation assets. Standards, including distance to functional parkland by geographies as identified in the HGNP are being developed.
- Public engagement regarding the Active Transportation Wayfinding Pilot Program is ongoing.
- HRM currently supports 25 community gardens on municipal lands, including two locations with year-round greenhouses and one location with a community oven. Utilizing municipal assets, such as land and facilities, to promote food production and literacy is a key objective of JustFOOD Action Plan for the Halifax Region.⁵

Current and Future Project Work

The HGNP recommends 16 actions that guide current and future project work. The following highlights project work that has been undertaken based on direction from the HGNP:

- Updates to the Municipal Design Guidelines (Red Book) were approved on November 9, 2021, including requirements for planting street trees in front of developments. Additional HGNP actions will be considered in the 2022 Red Book update.
- HRM Urban Forestry planted their largest annual number of street and park trees, approximately 3100, and received grant funding to continue to increase the capacity of the Urban Forest Master Plan and Tree Planting Program.
- The National Disaster Mitigation Program Project identified flood mitigation strategies (including planning policy, drainage studies, new infrastructure) for the top ten flood sites in the municipality. These strategies will be presented to Halifax Regional Council for consideration.
- HRM staff participated in the Nova Scotia Crown Share Land Legacy Trust Wildlife Corridor Design Charette and are reviewing the report produced as part of the Regional Plan Review.

Partnerships

The HGNP recommends 14 actions related to partnerships with other levels of government, universities, non-profits, community groups and private landowners to support environmental protection and management. The following highlights some of the work undertaken in 2021 based on the recommendations of the HGNP:

³ https://cdn.halifax.ca/sites/default/files/documents/city-hall/regional-council/220712rc15113_0.pdf

⁴ More information on Sharing Our Stories is available at <https://www.halifax.ca/about-halifax/regional-community-planning/regional-plan/sharing-our-stories>

⁵ More information on JustFOOD is available at <https://www.shapeyourcityhalifax.ca/foodaction>

- The Municipality continued to work with partners to support the use of green infrastructure in the public right-of-way and in specific stormwater management projects, including the Sawmill River Daylighting Project, Spring Garden Road Enhancement and Prince Albert Road Diet.
- The Municipality is advancing regional park planning and development, including Blue Mountain-Birch Cove Lakes, which is a project formally supported through a Statement of Collaboration between Parks Canada and HRM.

Additional Resources and Coordination

There is additional work needed to improve and coordinate staff efforts to implement the HGNP and other Council Priority Plans that support environmental planning, including the Integrated Mobility Plan (IMP) and HalifACT. These programs are currently managed through a decentralized model, with more focused teams assigned to the IMP and HalifACT.

On January 25, 2022, Regional Council passed the following motion:

THAT Halifax Regional Council recommend that the Chief Administrative Officer be directed to prepare a staff report outlining an overall policy and process to coordinate the work of the departments of Planning and Development and Parks and Recreation. The aim is to ensure council can effectively implement HalifACT, IMP and the Green Network Plan. The staff report should consider the need for a coordinator to lead the Green Network Plan and an updated parks strategy, in light of the following:

- 1. The current Parks Canada urban park planning process for Blue Mountain-Birch Cove Lakes,*
- 2. The pending Sandy Lake study,*
- 3. Recently identified key wildlife corridors,*
- 4. HRM's natural asset inventory, and*
- 5. Housing development pressures.*

Staff anticipate this report will be brought forward later in 2022. The report will outline how current work is organized, identify any gaps, and outline a proposed approach for ongoing implementation as part of the budget and business planning process.

FINANCIAL IMPLICATIONS

There are no financial implications associated with this information report.

COMMUNITY ENGAGEMENT

The Halifax Green Network Plan was informed by three phases of extensive engagement with residents from urban, suburban and rural communities, provincial government departments and stakeholder groups. Those consultations provided valuable insight to inform the vision, principles, objectives, and actions within the HGNP. Additional public engagement will be carried out for individual HGNP action items as appropriate on a case-by-case basis.

					municipal assets and recommendations to recognize and commemorate the indigenous history of the lands now known as the Halifax Regional Municipality.	
79	Cultural Landscapes	Engage groups that have traditionally been underrepresented in planning initiatives, including African Nova Scotian, Mi'kmaq, Acadian, and immigrant communities, when developing cultural landscape plans and policies.	Guidance on migrant	<p>Guidance in use:</p> <ul style="list-style-type: none"> In support of the CHPP, engagement has been carried out with Acadian and African Nova Scotia community. Consultation is in process with the Mi'kmaq community. Requirements for engagement with under-represented communities is being considered for land suitability assessments in master planning exercises. 	<p>Guidance in use:</p> <ul style="list-style-type: none"> The Culture and Heritage Priorities Plan (now known as Sharing Our Stories) is expected to provide direction on the identification, prioritization and implementation of cultural landscapes. Sharing Our Stories is currently undergoing stakeholder consultation, focused on under-represented communities. It is targeted to be presented to Regional Council in 2020/21. Regional Council approved the recommendations of the <i>Committee on the Commemoration of Edward Cornwallis and the Recognition and Commemoration of Indigenous History</i> on July 21, 2020. Recommendations were related to changes to the commemoration of Edward Cornwallis on municipal assets and recommendations to recognize and commemorate the indigenous history of the lands now known as the Halifax Regional Municipality. 	<p>Guidance in use:</p> <ul style="list-style-type: none"> The final draft of Sharing Our Stories is currently being prepared for public consultation and is expected to be considered by Regional Council in 2022. One of the main objectives of the Plan is supporting equity in our cultural and heritage programs for traditional underrepresented communities.
