Hello! I would like to request to do a presentation for the Environment and Sustainability Standing Committee.

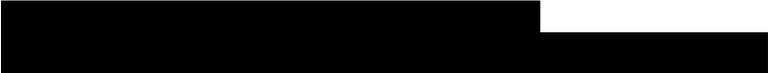

I recently attended the United National Convention on Biological Diversity 15th Conference of Parties (Nature COP 15) in Montreal. While there, I attended multiple presentations and discussions about the role of cities (and regions) in conserving and benefitting from biodiversity. In Halifax, I promote the adoption of policies and programs by HRM that help us all save and connect with the biodiversity of our region. My presentation to ESSC would include sharing what I learned about at Nature COP 15 that could be relevant to HRM Councillors and staff.

I could present at the February meeting of the ESSC.

I have presented to ESSC before.

Karen :)
