(a) using the formula:

$(A/B \times 100) \text{ minus } 100 = \text{percentage change in CPI}$

(b) where:

(i) “A” is the previous year’s Halifax All-Items Consumer Price Index, and

(ii) “B” is the Halifax All-Items Consumer Price Index for the base year in which this Appendix was adopted, or the year where the bonus zoning rate was last updated through a formal rate update by a trained valuation professional, whichever is later.

**Step 2:** The percentage change in CPI determined under Step 1 shall then be multiplied by the bonus zoning rate under Section 11.

**Step 3:** The product of Step 2 shall then be added to the bonus zoning rate, with the resulting sum becoming the new bonus zoning rate for the current bonus rate year.

13. If the *Halifax All-Items Consumer Price Index* declines or remains unchanged in a given year, there shall be no change in the bonus zoning rate for that year.
14. (1) The bonus zoning rate for the calculation of the required public benefit value shall be the bonus zoning rate at the time a complete application for a development permit is received by the Municipality.
- (2) Where the development permit expires and an application for a new development permit is made for the same development, the value of the public benefit shall be the difference between the bonus zoning rate at the time the new complete application is received and the bonus zoning rate previously paid.
