Thanks for the connection, Simon.

Hello Dorothy, nice to meet you here on email.

As mentioned below, we would be requesting to speak in front of the Environmental Sustainability Committee requesting a letter of support, which is a requirement from Nova Scotia's Community Solar Program in order to be selected for contract. It is not a letter related to planning or permitting the project, it is solely an application requirement.

We are currently in the phase of assembling the application package to submit to the province. Would it be possible to have us scheduled in the next available meeting?

Happy to discuss further on phone if you wish.

Best,

Mila Simon
