or call:
902-443-8141
Toll-free: 1-888-566-5864

This program is funded by:

Radon Gas

What you Need to know

Radioactive Gas

Radon is a radioactive gas caused by a breakdown of uranium in the soil. It can enter homes through openings like cracks in the foundation, and can build up to dangerous levels.

Causes Lung Cancer

Radon gas is the leading cause of lung cancer among non-smokers.

Testing Homes is Easy

Testing your home for high radon levels is easy and can be done with a do-it-yourself radon test kit.

Mitigate High Levels

If your home tests above 200 Bq/m³, hire a C-NRPP certified mitigation professional to mitigate your home from radon and reduce your risk.
