## SPECIAL EVENTS ELECTRICAL INSTALLATIONS

Name of Event: \_\_\_\_\_

Type of Structure/ Installation: \_\_\_\_\_

Location of Event: \_\_\_\_\_

Date: \_\_\_\_\_

The electrical contractor for this Special Event agrees that all installations on site meet National Fire Code, Tents and Air Support Structures; Section 2.9, Sentence 2.9.3.1, Articles 1, 2, 3, 4., the Canadian Electrical Code, Part 1, Section 76 - Temporary Wiring, and the NS Dept. of Labour and Advanced Education electrical bulletin 2009-03 respecting electrical installations at special events (<https://novascotia.ca/lae/electricalsafety/pdf/Bulletin2009-03.pdf>).

### 2.9.3. Fire Hazards and Control

#### 2.9.3.1. Electrical Systems

- 1) The electrical system in a tent or air-supported structure shall be maintained and operated in a safe manner.
- 2) Portable electrical systems shall be inspected for fire hazards and defects shall be corrected before the tent or air-supported structure is occupied by the public.
- 3) The electrical system and equipment in a tent or air-supported structure, including electrical fuses and switches, shall be inaccessible to the public.
- 4) Cables on the ground in areas used by the public in a tent or air-supported structure shall be placed in trenches or protected by covers to prevent damage from traffic.
