HALIFAX

Item 13.1.1

Park Lighting Strategy

Parks & Recreation
Policy & Planning

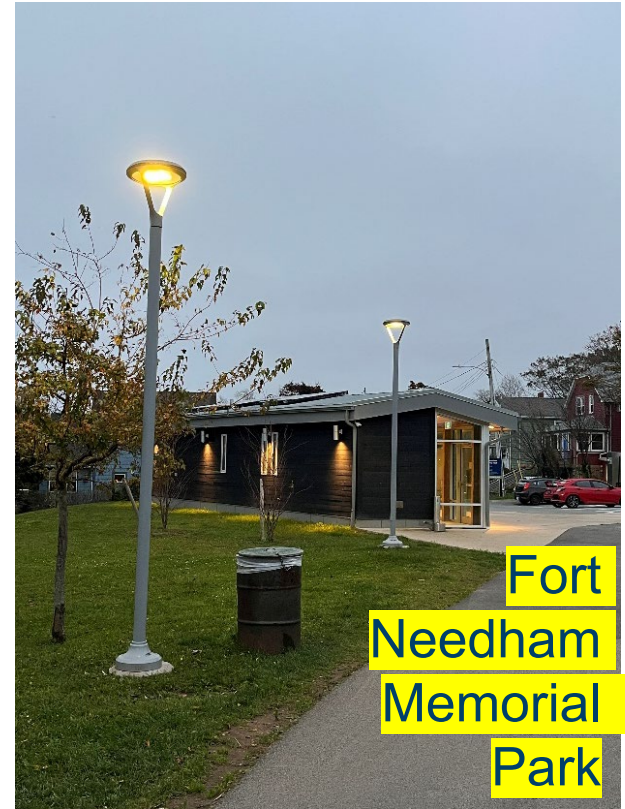

Origin

- June 8, 2021 Halifax Regional Council motion (Item Number 11.7.1) - Staff report request for developing a park lighting strategy
- August 23, 2022 Halifax Regional Council motion (Item No. 15.1.7) Scoping report to develop a strategy that guides the design and implementation of park lighting
- 2023/24 Parks & Recreation Business Plan

Background

- No formal process in place
- Expected component of public life
- Thoughtful and measured approaches are needed
- Enhance safety, security, overall enjoyment

Lighting Scenarios

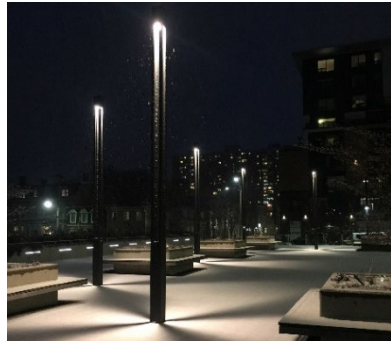

Pathways

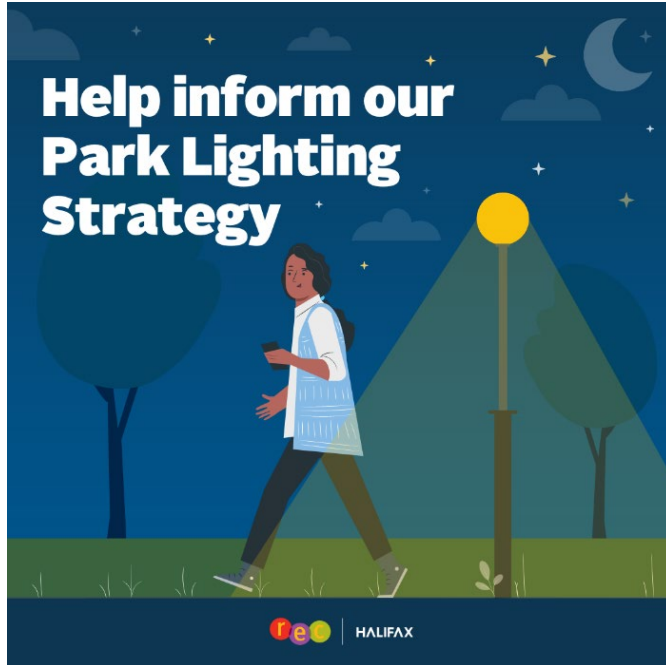

Facilities

Placemaking

Public Engagement

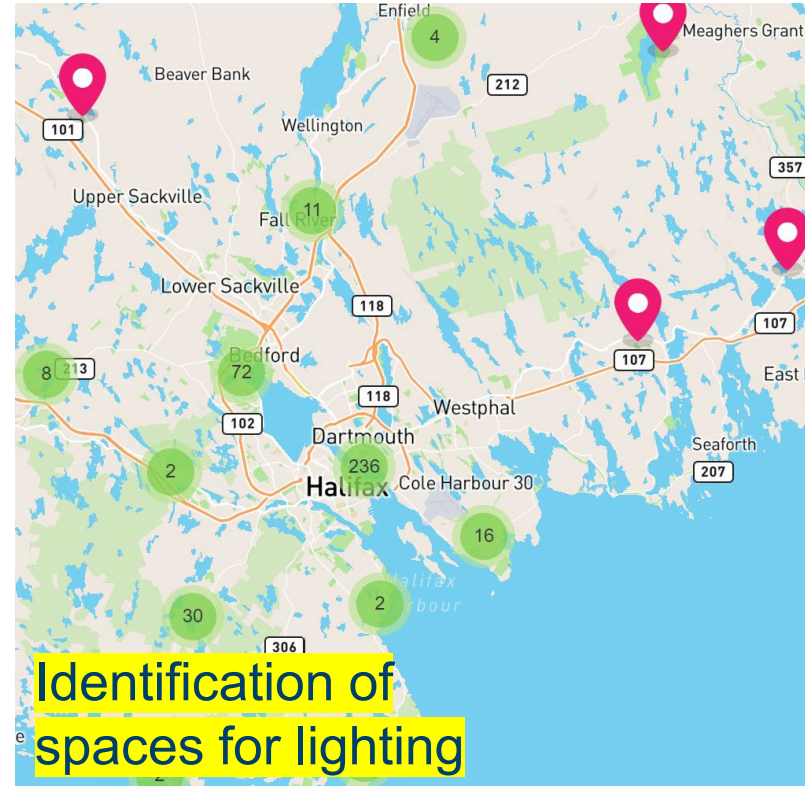

- ‘Shape Your City’ program, May 15 - June 18, 2023
- 1,000 online participants
- Lived experience committees
- Internal & external stakeholders

HALIFAX

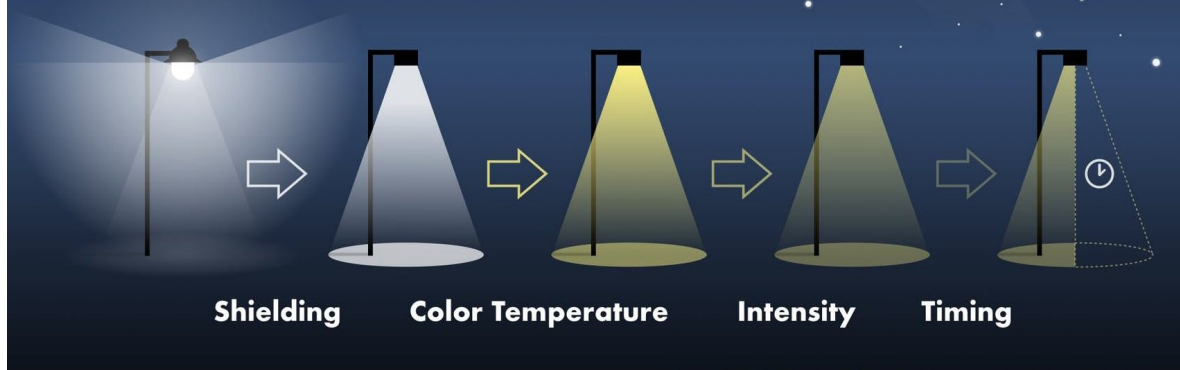

Public Engagement

- Park use after dark is limited
- Lighting improves park visitorship
- Attention needed for winter and shoulder season lighting
- Concern for interrupted human and environmental cycles
- Lighting effectiveness and efficiency is important

New Guidance for Lighting

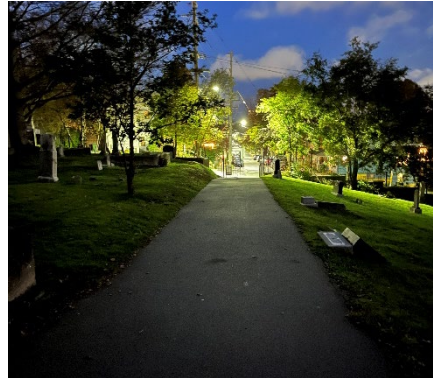

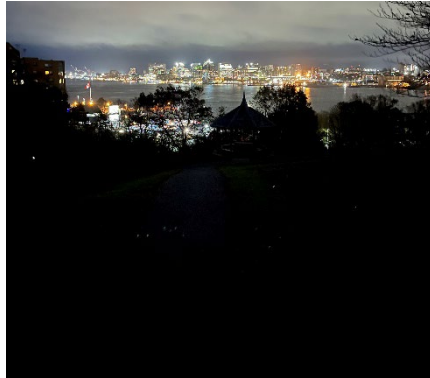

1. All new projects are to consider lighting
2. Existing spaces are to be evaluated as needed
3. Lighting should be high quality

Quality
lighting
considerations

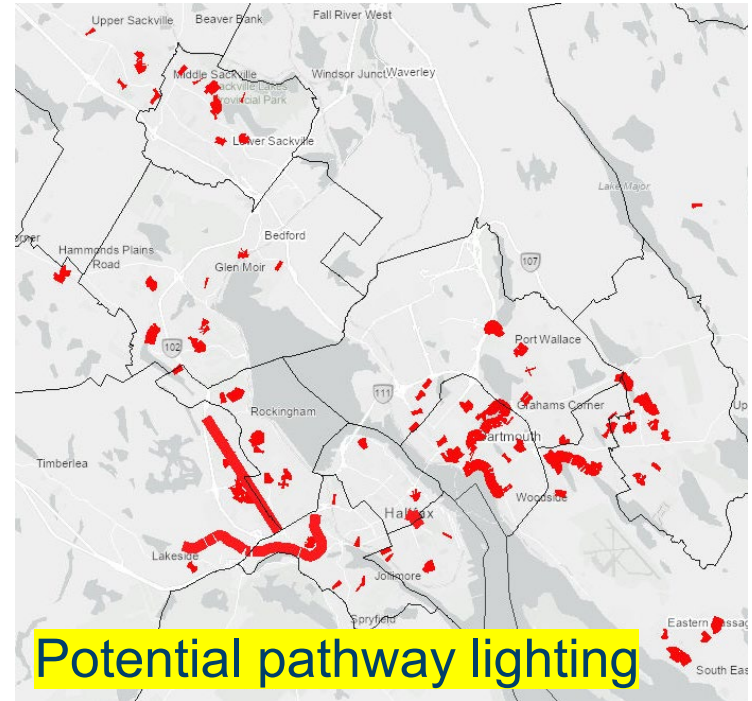

New Guidance for Lighting

4. Emerging technologies will be monitored
5. A site analysis is a critical process
6. Park safety assessments help to understand space

Future Business Planning

- Policy change for park use
- Policy change for better alignment
- Development of a green book standard
- Capital planning

Park Lighting Strategy
