**Request for Presentation to Community Planning & Economic Development Council (CPED) Standing Committee**

The Discovery Centre respectfully requests the honour of presenting to CPED at its February 13<sup>th</sup> meeting. In a brief presentation we will showcase a very exciting project for our city. One that time and time again has been requested by the residents of our city. With capital fundraising and construction near completion on this multi-million dollar project, The Discovery Centre and Dalhousie University will be opening the City's first permanent Biodiversity and Aquarium facility this summer 2025.

This project is vital to the mission of Dalhousie University, Discovery Centre, and ultimately the City of Halifax —the Beaty Centre for Marine Biodiversity in Halifax, Nova Scotia will help our city bring the wonders of ocean life into the public eye in a way that will resonate for generations.

This new and globally unique facility will be one that municipal stakeholders will be delighted to participate in. We would be delighted if you could ensure we have some time to present at the upcoming February meeting.

Please feel free to contact me on my cell at **Redacted** if you need any further clarifications or information.

Yours truly,

**Redacted**

Dov Bercovici  
President and CEO

**Municipal Clerks Office**
