Hello Dorothy,

At the meeting of March 6, 2025, councillors urged A Thousand Lakes to escalate our efforts to encourage better stormwater management in HRM to the provincial level. We are doing that. We are also planning interventions at the federal level.

On behalf of A Thousand Lakes, I would like to request to present an update to the ESSC regarding our initial efforts in this direction.

We would ideally like to present at the meeting of August 7. Since I will be out of province on that date, the presentation would have to be by Zoom.

The presentation would be supported by our recent letter to provincial Minister of Environment and Climate Change Tim Halman (attached), as well as any materials targeted to the federal level that we may have produced by then.

With thanks to the Committee for considering our request,

C<sup>o</sup> Gaudet
