Areas of Elevated Archaeological Potential

Legend

 Areas of Elevated Archaeological Potential

Description:

Archaeological resources are the remains of any building, structure, activity, place or cultural feature or object that, because of the passage of time, is on or below the surface of land or water and is of significance to the understanding of the history of a people or place. These sites are protected under provincial legislation, the Special Places Protection Act, which regulates the destruction, alteration or removal of archaeological resources from these sites.
