

IMPORTANT INFORMATION

MANDATORY INSPECTIONS

Building Inspections

Pursuant to Part 2 of the Nova Scotia Building Code Regulations, the Building Official shall be notified and given an opportunity to inspect for compliance with the Building Code the following:

1. **footings** in place, forms removed (see location certificate requirement);
2. **foundation** – prior to backfilling, and before superstructure is placed upon;
3. **underground plumbing** – rough in under slab plumbing
4. **below grade insulation** (if required) – before the basement floor or slab-on-grade is placed;
5. **rough-in plumbing** – completed rough in plumbing of structure;
6. **framing** – weather tight, and roughed-in plumbing and mechanical systems;
7. **prior to drywall** – insulation prior to the installation of drywall or covering over framing; and
8. **building final** – final building and final plumbing prior to occupancy of the structure.

ADDITIONAL INFORMATION

Location Certificates After your foundation, frost wall, or pre-engineered structural slab has been placed, a Surveyors Location Certificate is required. Only when this is received, and the Building Official is satisfied that the foundation is situated in compliance with the approved plans, will the mandatory foundation inspection be carried out.

New Septic Systems If a new septic system is to be installed, a copy of the final inspection report, prepared by a Qualified Person, must be provided to this office prior to our issuance of the Occupancy Permit.

DISPOSAL OF C&D WASTE

Construction and Demolition (C&D) Waste Construction, renovation or demolition projects create waste such as lumber off cuts, wallboard leftovers, used shingles and old plumbing fixtures.

On February 3rd, 2015 Halifax Regional Council approved changes to the Solid Waste Resource Collection and Disposal By-law S-600. Please note that construction and demolition (C&D) waste is not included in the new export changes, therefore is not permitted to leave the boundaries of HRM.

C&D waste is unacceptable for disposal at the Otter Lake landfill and must be taken to a licensed C&D facility for processing. There are two (2) such licensed operations in HRM:

188 Ross Rd., Westphal (902-876-8644)

16 Mills Dr., Goodwood (902-876-8644)

REQUESTING AN INSPECTION

Inspections can be requested via HRM's on-line Customer Portal at <https://plc.halifax.ca/hfxprod/pub/lms/Login.aspx>.

To arrange for an inspection for a legacy permit (6-digit permit number) call the inspection line at 902-490-7097.

Please include the permit number, type of inspection, address, and contact information.

Every effort will be made to conduct all requested inspections received prior to 7:00 am within 48 hours.

IMPORTANT INFORMATION

CONTACT US

Building Officials can be contacted at the numbers listed below.

Please Note: Building Officials spend much of their time in the field and may not always be immediately available to answer your call. Leave a detailed message and the Building Official will return your call within 1 business day.
