

File – Open

- The street is currently under assessment, or
- The street has been assessed and qualifies for implementation.

File – Closed

- The street does not meet the screening process (AO 15-004-OP, Section 3),
- The assessment is complete and the street does not qualify, or
- Traffic calming measures have been installed and evaluated under the Traffic Calming AO. The process is complete.

Stage - Ineligible

- The street does not meet the screening process.

Stage - Data Collection 1

- The street meets the screening process. Speed and volume data is not available on file so it will be collected.
- If the 85th percentile speed does not meet the minimum thresholds in Sections 10 and 10A the request will be closed at this stage.

Stage - Data Collection 2

- Speed and volume data collection is complete and the 85th percentile speed meets the minimum thresholds in Sections 10A(b) and 11. We are currently reviewing collision history and street characteristics to assign priority points for ranking.

Stage – Ranked

- All points have been assigned and the street has been ranked in accordance with Section 23.

Stage – Plan Dev.

- We are in the process of selecting appropriate traffic calming measures and preparing a design for installation.

Stage – Installation

- Project is approved and installation is pending or ongoing.

Stage – Evaluation

- Traffic calming measures have been installed and we are awaiting follow up speed/volume data on the street.

Stage – Complete

Speed reductions have been achieved, no further action required.
